# 01 Welcome

These individual conversation classes at TECH allow students to advance on their path towards mastering the Italian language, training them in the oral management of this *molto bello* language. Thanks to this program compiled by native university professors, experts in teaching French, you will learn all areas of language use: grammar, vocabulary, formal and colloquial expression, writing and reading at an advanced level of comprehension. This allows the student to pass the Common European Framework of Reference for Languages (CEFR) Level B1 Italian oral test.

Presentation video

“

*You can do it! Get involved in level B1 Italian conversation with TECH and perfect your language skills from the comfort of your own home"*

## Introduction

TECH proposes something completely different, distancing itself from the traditional education found in language academies and schools, which provide teaching based on the repetition of simple linguistic structures with no connection to adequately structured content or specific competencies. It has been proven that the best way to stimulate language learning is not to subject the learner to formalized, linear learning (for example, based on memory) but rather, to encourage imagination and learning through sensory exploration. This way, students are able to understand and interpret the environment and the context in an accurate way.

This is the only way in which the brain can work and learn a second language in the most natural way, in the same way that one learns to speak one's mother tongue. For this reason, TECH offers B1 Italian individual conversation classes with university professors and native speakers, who will provide personalized and 100% online Italian conversation classes in both common and specific communicative situations. Therefore, the student will gain an in-depth understanding of the structure of the Italian language and be able to maintain conversations on a complete basic level, all with the guarantee and prestige of TECH.

*Expanding Vocabulary! Our native teachers will teach you to maintain a fluid conversation on daily topics and specific situations.*

*This course takes place entirely online over 4 months and 40 live quality sessions with language teaching experts.*

*Take a step forward in your Italian learning and perfect your level with this B1 course. You will be moving towards your professional goals with the security of an effective learning method"*

# Is it Important to Obtain a Language Certificate?

In today's competitive world, speaking other languages is a key part of our modern culture, helping us to expand our knowledge and interact with people from other parts of the world, which helps us to learn about the traditions of other countries, establish friendships or conduct business.

However, simply knowing foreign languages is not enough in modern society.

**Nowadays, you must have an official qualification** that accredits and recognizes your proficiency in a given language. In fact, many schools, universities and companies **only** accept candidates who have an official qualification based on the **Common European Framework of Reference for Languages (CEFR)**.

“

*The ability to communicate effectively in another language, and accredit it with an official CEFR qualification, is an essential requirement for your academic and professional development. TECH helps you achieve it with intensive 100% CEFR training"*

## TECH Global University

The Common European Framework of Reference for Languages is the **only officially recognized and accredited system for assessing a student's level of proficiency**. Although there are other certification systems, these come from private institutions and are, therefore, **not officially valid**. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH we offer you the only intensive program designed to prepare you to obtain your official certificate based 100% on the CEFR, the only official system recognized and accepted throughout Europe.

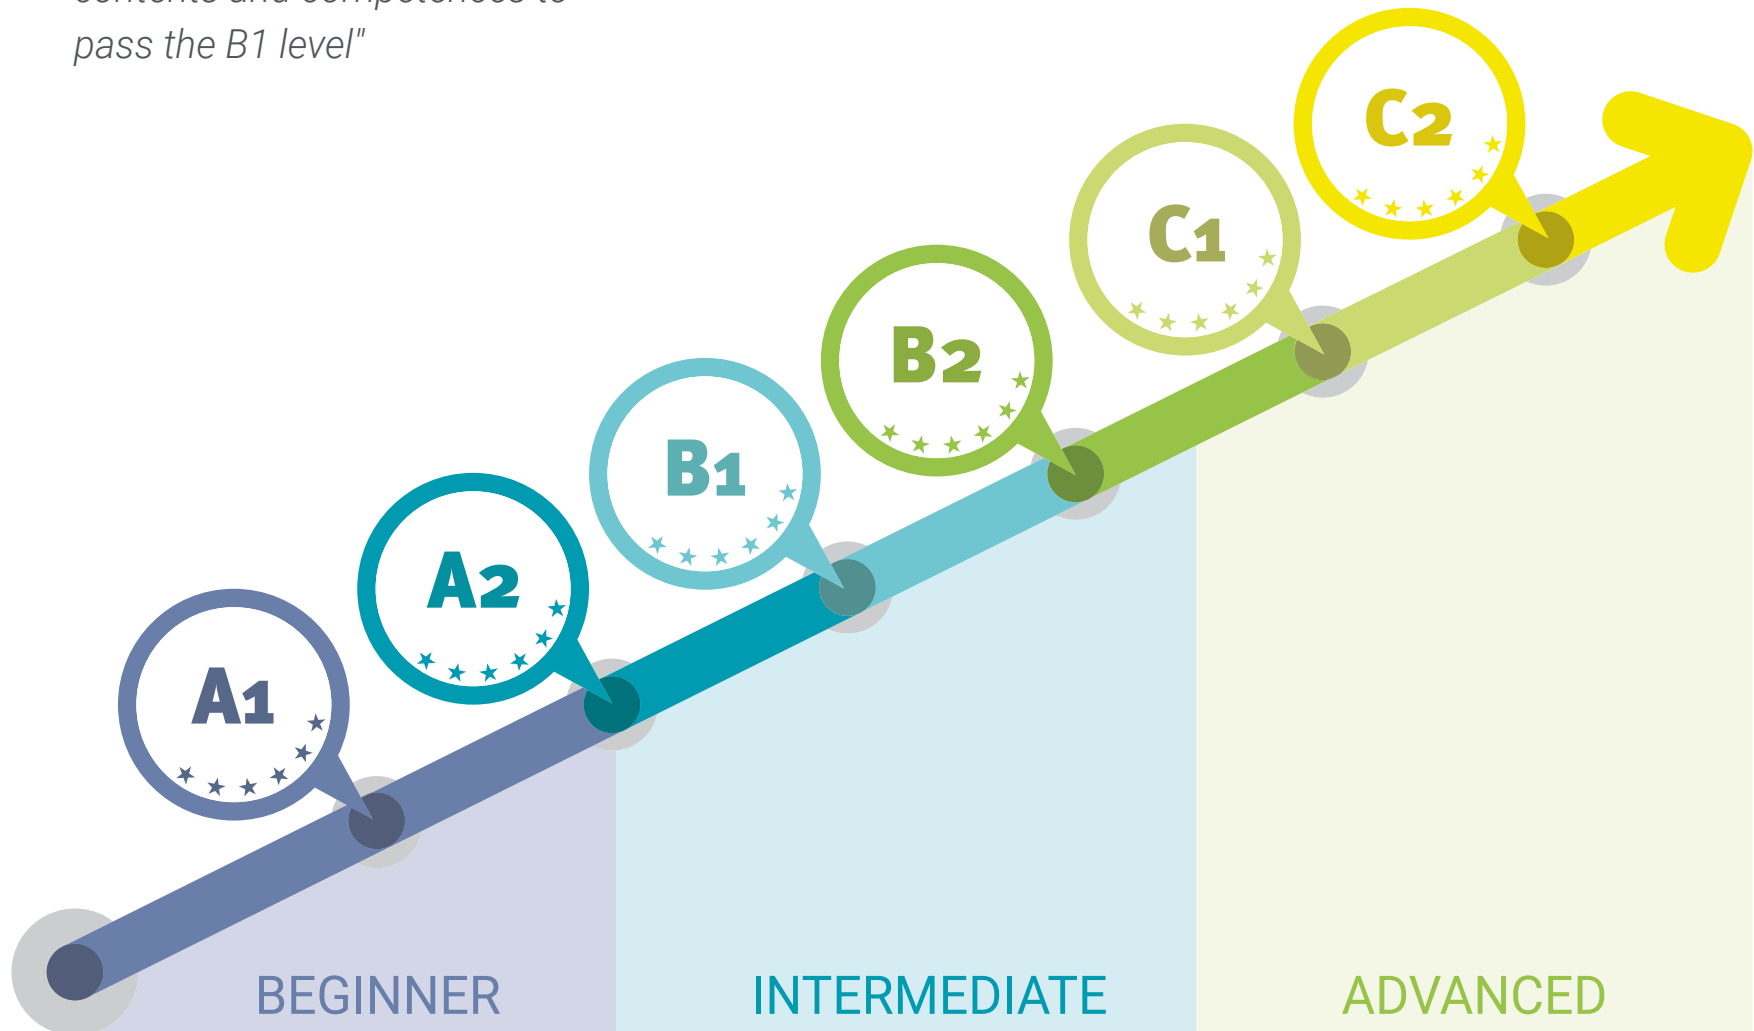

*Finally learn to speak fluent Italian and make the most of it by accrediting it with an official qualification based on the CEFR.*

*Other private language certification systems require students to periodically recertify their level of proficiency. TECH's CEFR certificate is valid for life*

“

*With this preparation program you will have all the necessary contents and competences to pass the B1 level”*

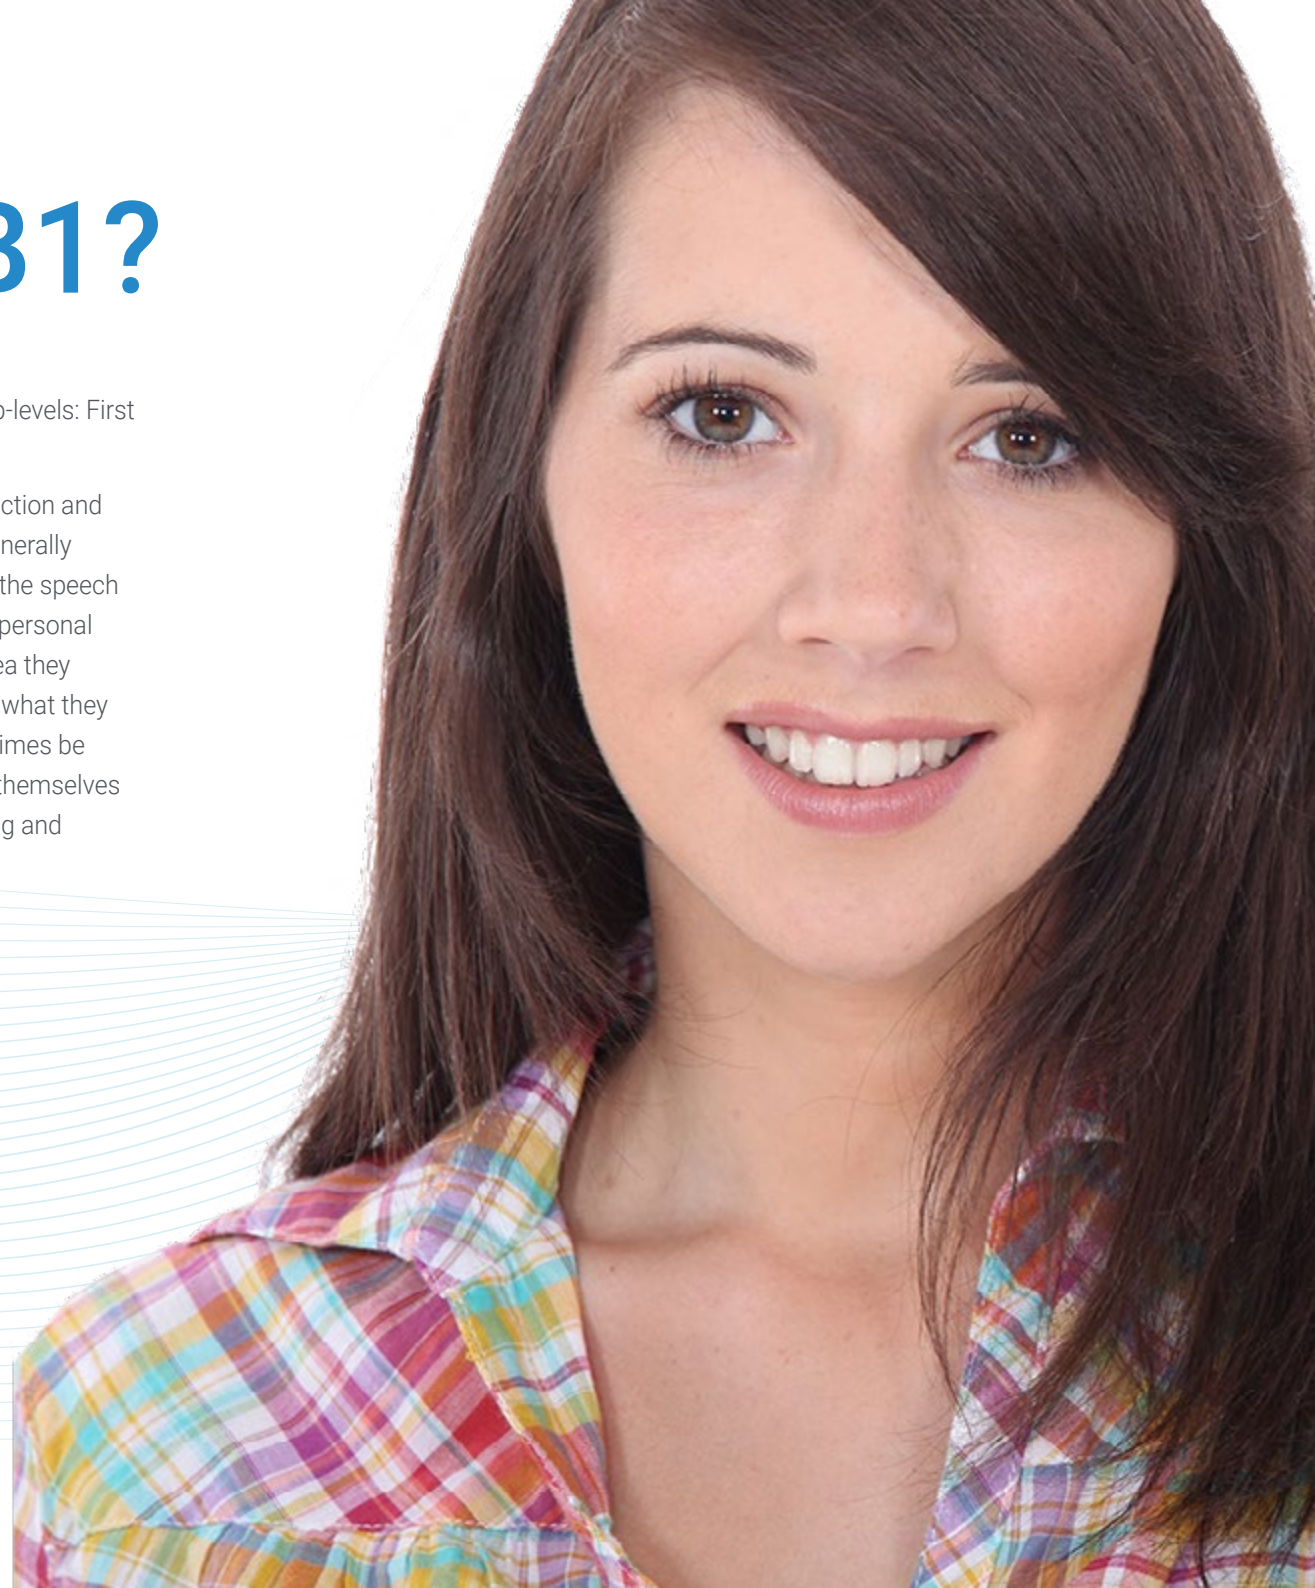

03

# What Is Level B1?

Level B1 is part of the Independent User Level, which is divided into two sub-levels: First and Second Independent User Level (B1 and B2).

The B1 Level has two main features: the first is the ability to maintain interaction and make oneself understood in a variety of situations, for example: learners generally understand the main ideas of extended discussions around them provided the speech is clearly articulated at a standard language level; they can offer and ask for personal opinions in an informal discussion with friends; clearly express the main idea they want to get across; flexibly use broad, simple language to express much of what they want; they are able to carry on a conversation or discussion, but can sometimes be difficult to understand when trying to say exactly what they mean; express themselves understandably, although pauses for some grammatical and lexical planning and mistake-correcting is evident, especially in long periods language flow.

The second feature is the ability to know how to deal flexibly with everyday problems, such as, for example: coping with less common situations in public transport, the typical situations that often arise when making travel reservations through an agency or when traveling; participates in conversations on usual matters without having anticipated it; being able to raise complaints; taking the initiative in an interview or consultation (e.g., knows how to initiate a new topic), although still being noticeably dependent on the interviewer during the interaction; knowing how to ask someone to clarify or develop what he or she has just said.

*In TECH's B1 Italian Individual Online Conversation Classes program we will thoroughly prepare you to obtain your official B1 Italian certificate"*

## What Is Level B1?

01

Can understand the main points of clear, standard-language texts on familiar matters, whether in work, study or leisure situations

02

Knows how to deal with most of the situations that may arise during a trip in areas where the language is used

“

*Improve your skills in this language and certify your level quickly and easily thanks to everything you will learn in this excellent program offered by TECH”*

03

Is able to produce simple and coherent texts on topics that they are familiar with or in which they have a personal interest

04

Can describe experiences, events, desires and aspirations, as well as briefly justify their opinions or explain their plans

# Our Methodology

The B1 Italian Individual Online Conversation Classes program is an intensive course for the Italian B1 level certificate based 100% on the Common European Framework of Reference for Languages (CEFR). For this purpose, we use a method of oral proficiency practice in which the student works intensively and repeatedly on all the contents required by the Framework, providing them with extensive preparation to pass the test.

“

*Enter level B1 with guarantees! TECH's famous personalized classes enable you to reach the level proposed by the CEFR”*

## The TECH Global University method

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

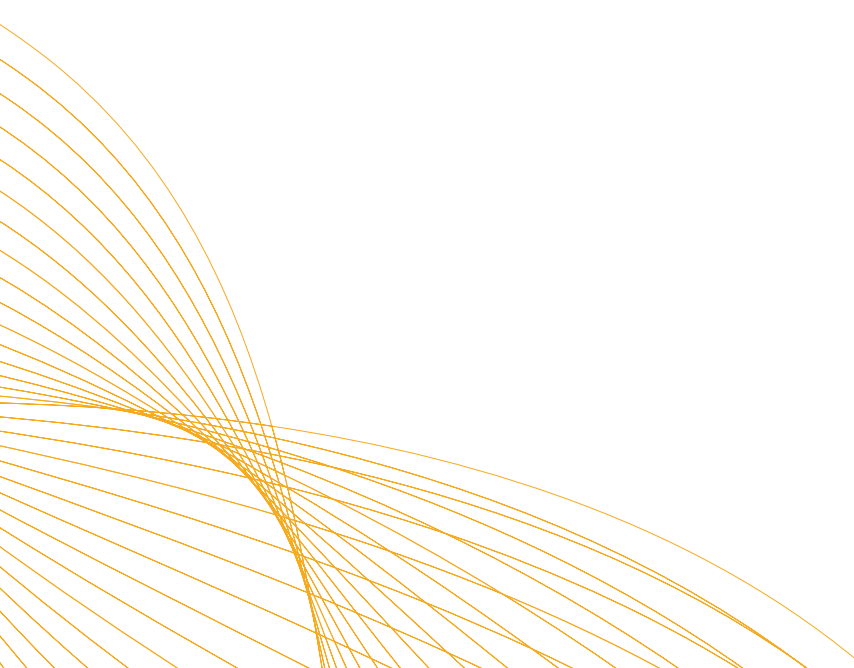

TECH's b1 Italian oral proficiency preparation program offers you a method based on interaction and synchronous and direct communication between teacher and student to thoroughly prepare for the official level certification oral test. Our objective is to strengthen your skills in a changing, real and multicultural context and to guarantee your success in passing the test. To this end, we emulate the final exam using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively for the level certification test.

*...All of this is enhanced with the best 100% online teaching methodology: Re-learning...*

Our school is the first in the world to combine storytelling with a 100% online learning system based on repetition, which combines different elements that represent an evolution with respect to the simple study and performance of exercises.

*TECH offers you the highest quality and quantity in the academic landscape, with hundreds of exercises and resources for you to keep improving your level step by step.*

This methodology, at the forefront of world teaching, is called Re-learning. Our language school is the first in the world licensed to employ this successful method, having managed in 2015 to improve the overall satisfaction levels (teaching quality, quality of materials, course structure, Objective, etc.) of the students who complete the courses with respect to the indicators of the best language courses on the market.

*The overall score obtained by our learning system is 8.01, according to the highest international standards.*

### Re-learning Methodology

We prevent your motivation from waning and offer you the best learning environment.

TECH's intensive oral proficiency preparation program is based on synchronous, real-time communication, as this type of interaction has been proven to enhance personal involvement, work interaction, social-emotional relationships and personal interactions, increasing motivation. (Hrastinski, 2008).

*...with a personalized and expert-led training itinerary...*

In order to promote maximum contact with the Language School, we provide you with a tutor so that you can write essays, receive answers to your questions or get advice on how to study.

“

*Our system will allow you to organize your time and learning pace, adapting it to your schedule, and will also allow you to access the contents from any device with an internet connection (computer, tablet, smartphone)”*

According to the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. In this way, and in what is called "Neurocognitive context-dependent learning", the different elements of our intensive Italian B1 preparation course are connected to the context in which the participant will take their official certification exam in order to guarantee success on the day of the test.

*... and all this with teachers at the forefront of technology and education...*

*Study wherever and however you want: connect with your mobile device and learn with the best native teachers.*

# The Professional Benefits of Italian

Italian is a beautiful and romantic language, the language of ancient medieval thinkers, historical writers, and possesses a unique musicality and conceptual richness in a wide variety of fields. It is the language of Dante, Petrarch and Boccaccio, three great Italian writers, but it is also the language of art, history, science, gastronomy and fashion.

As the birthplace of Latinity, Italy played a decisive role in the diffusion of Latin and the culture of the Roman Empire in the rest of Europe, both in Ancient times and in the ages that followed. Similarly, after the affirmation of the Neo-Latin languages and the constitution of modern linguistic Europe, Italian has had, at times, moments of great importance in the international linguistic context.

Approximately 70 million people worldwide speak Italian (60 million in Italy and around 10 million in the rest of the world). It is the official language in Italy, Switzerland, San Marino and Vatican City. It is spoken, at least in part, in eleven countries, to which must be added some twenty countries with a large Italian community, such as Argentina, Germany, Australia and the USA.

Italian is one of the official languages of the European Union, therefore, speaking Italian will open the doors to many international organizations and also the possibility of working in many of the large Italian companies with international presence. The Italian economy is principally based in three sectors, tourism, the automotive industry and fashion.

“

*For all these reasons, Italian is found amongst the ten most useful languages in the world and its considered necessary to succeed in the 21st Century”*
