Presentation video

“

*This online program of conversation classes is what you need to reach Italian Level B2. Don't think twice and enroll!*”

## Introduction

TECH proposes something completely different, distancing itself from traditional education found in language academies and schools, which provide teaching based on the repetition of simple linguistic structures with no connection to adequately structured content or specific competencies. It has been proven that the best way to stimulate language learning is not to subject the learner to formalized, linear learning—for example, based on memory—but rather, to encourage imagination and learning through sensory exploration. This way, students are able to understand and interpret the environment and the context in an accurate way. This is the only way in which the brain can work and learn a second language in the most natural way, in the same way that one learns to speak one's mother tongue.

For this reason, TECH offers you 100% personalised Italian Conversation Classes at B2 level, with university native teachers who will provide you with specific and common communicative situations, individually and 100% online. In this way, the student will master the structure of the Italian language with a high level of proficiency and will be able to hold conversations at an advanced level.

*With TECH's conversation classes you will be able to articulate oral productions fluently and effectively in Italian on different topics, as they are completely personalized. Jump in!*

*In just one 60-minute session you will notice the change. Imagine with 40! Don't hesitate, in 4 months you will obtain the CEFR Italian Level B2 that you have wanted for a long time.*

*Master the Italian language at an advanced level and acquire with TECH the communicative skills you need to develop linguistically"*

# Is it Important to Obtain a Language Certificate?

In today's competitive world, speaking other languages is a key part of our modern culture, helping us to expand our knowledge and interact with people from other parts of the world, which helps us to learn about the traditions of other countries, establish friendships or conduct business.

However, simply knowing foreign languages is not enough in modern society.

**Nowadays, you must have an official qualification** that accredits and recognizes your proficiency in a given language. In fact, many schools, universities and companies **only** accept candidates who have qualification based on the **Common European Framework of Reference for Languages (CEFR)**.

“

*The ability to communicate effectively in another language, and accredit it with an CEFR qualification, is an essential requirement for academic and professional development. TECH helps you achieve it with intensive 100% CEFR training”*

## TECH - Technological University

The Common European Framework of Reference for Languages is the **only system that recognizes and accredits the student's level**. Although there are other certification systems, these come from private institutions and are, therefore, **not valid**. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH we offer you the only intensive program of preparation for oral communicative competence to guarantee that you will obtain your level certificate based 100% on the CEFR, the only system recognized and accepted throughout Europe.

*Learn to speak Italian and make the most of it by obtaining a qualification based on the CEFR.*

*Other private language certification systems require students to periodically recertify their level of proficiency. The TECH CEFR certificate is valid for life.*

“

*With this preparation program you will have all the necessary contents and competences to pass the B2 level”*

# What Is Level B2?

Level B2 is part of the Independent User Level, which is divided into two sub-levels: First and Second Independent User Level (B1 and B2).

B2 level has two main features: The first is the ability to maintain an interaction and make oneself understood in a variety of situations; for example: generally understanding the main ideas of extended discussions around them as long as the speech is clearly articulated at standard language level; offers and asks for personal opinions in an informal discussion with friends; expresses in an understandable way the main idea they want to get across; flexibly uses broad, simple language to express much of what they want; is able to carry on a conversation or discussion, but can sometimes be difficult to understand when trying to say exactly what they want; expresses themselves understandably, although pauses for some grammatical and lexical planning and some correctness are evident, especially in long periods of free production.

**B<sub>2</sub>**

The second feature is the ability to know how to deal flexibly with everyday problems, such as, for example: coping with less common situations in public transport, the typical situations that often arise when making travel reservations through an agency or when traveling; participates in conversations on usual matters without having anticipated it; being able to raise complaints; taking the initiative in an interview or consultation (e.g., knows how to initiate a new topic), although still being noticeably dependent on the interviewer during the interaction; knowing how to ask someone to clarify or develop what he or she has just said.

“

*In TECH's Online Conversation Classes program we will thoroughly prepare you to obtain your B2 Italian certificate”*

## What are the B2 Level Skills?

01

It is the ability to understand the main ideas in complex texts which deal with both concrete and abstract topics, even if they are of a technical nature, as long as they are within their field of expertise

02

You can interact with native speakers with a sufficient degree of fluency and naturalness, so that communication is effortless for the interlocutors

“

*Improve your skills in this language and certify your level quickly and easily thanks to everything you will learn in this excellent program offered by TECH”*

03

You can produce clear and detailed texts on a range of diverse topics, as well as defend your point of view on general topics, indicating the pros and cons or different options

# Our Methodology

The B2 Italian Online Conversation Classes program is an intensive and personalized course that enables the student to obtain the B2 Level certificate in Italian based 100% on the Common European Framework of Reference for Languages (CEFR). For this purpose, TECH employs a method of oral proficiency practice in which the student works intensively and repeatedly on all content required by the Framework, providing them with preparation to pass the test according to the standards of quality and rigor that define TECH, the largest online university in the world.

“

*Only TECH will enable you to achieve the CEFR Italian Level B2 in such a short time and with guaranteed success”*

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

TECH's Italian Level B2 oral proficiency preparation program offers you a method based on interaction and synchronous and direct communication between teacher and student to comprehensively prepare for the oral level certification test. Our objective is to strengthen your skills in a changing, real and multicultural context and to guarantee your success in passing the test. To this end, we emulate the official test using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively, for the level certification test.

*...All of this is enhanced with the best 100% online teaching methodology: Re-learning...*

Our school is the first in the world to combine *storytelling* with a 100% online learning system based on repetition, which combines different elements that represent an evolution, with respect to the simple study and performance of exercises.

*TECH offers you the highest quality and quantity in the academic landscape, with hundreds of exercises and resources for you to keep improving your level step by step.*

This methodology, at the forefront of world teaching, is called *Re-learning*. Our language school is the first licensed to employ this successful method, having managed, in 2015, to improve the overall satisfaction levels (teaching quality, quality of materials, course structure, objectives, etc.) of the students who complete the courses, with respect to the indicators of the best language courses on the market.

*The overall score obtained by our learning system is 8.01, according to the highest international standards.*

**Re-learning Methodology**

We prevent your motivation from waning and offer you the best learning environment.

TECH's B2 French Individual Online Conversation Classes is based on real-time communication, as it has been proven this type of interaction enhances personal participation, reinforces interaction at work, socioemotional relationships and personal interactions, while increasing motivation. (Hrastinski, 2008).

*...with a personalized and expert-led  
training itinerary...*

In order to promote maximum contact with the Language School, we provide you with a tutor so that you can write essays, receive answers to your questions or get advice on how to study.

“

*Our system will allow you to organize your time and learning pace, adapting it to your schedule, and will also allow you to access the contents from any device with an internet connection (computer, tablet, smartphone).”*

According to the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. In this way, and in what is called *Neurocognitive Context-Dependent Learning* the different elements of our intensive Italian B2 Language Course are connected with the context in which the participant will take their certification exam in order to guarantee success on the day of the test.

*... and all this with teachers at the forefront of technology and education...*

*Study wherever and however you want: connect with your mobile device and learn with the best native teachers.*

- Understand long speeches and complex lines of reasoning as long as the subject matter is reasonably familiar and the development of the speech is facilitated by explicit markers
- Understand any type of speech, both face-to-face conversations and broadcast speeches, on topics, usual or not, of personal, social, academic or professional life. Only excessive background noise, inadequate structuring of speech or idiomatic use of language affect their ability to understand

- Follow lively conversations between native speakers
- Understand the main ideas of linguistically complex lectures, talks, reports, and other forms of academic and professional presentation

- Understand recordings in standard language that may be encountered in social, professional or academic life, and identify the speaker's points of view and attitudes, as well as the content of the information

*These classes enable you to produce flexible speech with clear and natural pronunciation. Express yourself in Italian with confidence, do it with TECH!"*

Communicate spontaneously and have good grammatical control, without showing many signs of having to restrict what they say and adopting a level of formality appropriate to the circumstances
- ♦ Understand in detail what is said in standard language, even in an environment with background noise
- ♦ Address, in a clearly participatory manner, extensive conversations on most general topics, even in a noisy environment
- ♦ Have conversations with native speakers without unintentionally amusing or annoying them, and without demanding different behavior from them than they would have with a native speaker

## Specific Objectives

### Sociocultural and Sociolinguistic Competence

- Broaden and diversify your knowledge of the sociocultural aspects of communities where the language is spoken, acquiring a natural and confident manner of speaking that doesn't draw attention to you or lead to you being treated differently to native speakers. Also learn how to adapt your behavior, reactions, attitude, the messages you convey and your wording to any changes in situation, style and emphasis
- Identify the most important aspects of a variety of common formal and informal, oral and written registers, and appropriately use the expressions, pronunciation and intonation of the most common registers with which you are in contact more frequently
- Perceive the differentiating characteristics of the Italian language pattern in relation to other widespread or nearby patterns

### Linguistic Competence

- Manage a wide and varied repertoire of linguistic resources, including complex syntax and textual grammar, to naturally approach with precision and clarity texts on a vast range of situations and topics, almost without showing you have limited knowledge of what you want to say
- Flexibly adapt to changes in direction, register and emphasis, although hesitations and circumlocutions can still occur
- Efficiently use a variety of connectors and discourse markers to clearly show the link between different ideas, and to speak coherently and efficiently while adapting to the context
- Possess a good control of linguistic resources with few faults, when using complex structures, especially in the development of discourse, especially oral, or in less common situations. Some cohesion or adaptation to new registers errors may appear, as well as sporadic slips or "resistant" errors in situations of less monitoring, which it is capable of self-correcting

“

*You will possess a control of linguistic resources with few failures, being able to use complex oral structures"*

*"I have been trying to learn Italian for years, but with most online courses I found myself unmotivated and just gave up. With this training, I have felt supported, I have worked on simple things, little by little, through a large number of activities, and all of this was made possible by an excellent team of teachers and an exceptional group of colleagues. I managed to pass the exam with no problems. I'm going for my second level next year and I'm thrilled!"*

*"I had been wanting to certify my Italian Level B2 for a long time to be able to focus on a work project in Milan, but I didn't see results with the classes at the academies. So, when I heard about these TECH classes I decided to give them a try and the truth is that I was surprised with how I progressed session by session, and without even realizing it!"*

# The Professional Benefits of Italian

Italian is a beautiful and romantic language, the language of ancient medieval thinkers, historical writers, and possesses a unique musicality and conceptual richness in a wide variety of fields. It is the language of Dante, Petrarch and Boccaccio, three great Italian writers, but it is also the language of art, history, science, gastronomy and fashion.

As the birthplace of Latinity, Italy played a decisive role in the diffusion of Latin and the culture of the Roman Empire in the rest of Europe, both in Ancient times and in the ages that followed. Similarly, after the affirmation of the Neo-Latin languages and the constitution of modern linguistic Europe, Italian has had, at times, moments of great importance in the international linguistic context.

Approximately 70 million people worldwide speak Italian (60 million in Italy and around 10 million in the rest of the world). It is the official language in Italy, Switzerland, San Marino and Vatican City. It is spoken, at least in part, in eleven countries, to which must be added some twenty countries with a large Italian community, such as Argentina, Germany, Australia and the USA.

Italian is one of the official languages of the European Union, therefore speaking Italian will open the doors to many international organizations and also the possibility of working in many of the large Italian companies with international presence. The Italian economy is principally based in three sectors, tourism, the automotive industry and fashion.

“

*For all these reasons, Italian is found amongst the ten most useful languages in the world and its considered necessary to succeed in the 21st Century.”*

# Assessment and Certification

The main evaluation objective in TECH is that the student consolidates what they have learned and is aware of their progress. For this reason, after completing each block, the student is shown a report of the results, which visually indicates the skills that they should strengthen.

“

*TECH'S B2 level oral communication skills preparation program is the only one that also awards you with a university certificate”*

## Certification

Upon completion of the course, the student will receive a certificate of recognition that will guarantee their preparation to obtain, if the student wishes, the certification of that level.
