Introduction

However, teachers and psychologists believe that the best way to stimulate language learning is not to subject the learner to formalized, linear learning - for example, with rote learning - but rather, to encourage imagination and learning through sensory exploration in order to be able to understand and interpret what is around us.

This way, the brain works and learns a language in the most natural way possible, in the same way that we learned our mother tongue. Thus, TECH offers you B2 Portuguese Individual Online Conversation Classes with university professors and native speakers who will provide you with common and specific communicative situations, 100% online and in a personalized way, with an innovative learning methodology. 02

Is it Important to Obtain a Language Certificate?

In today's competitive world, speaking other languages is a key part of our modern culture, helping us to expand our knowledge and interact with people from other parts of the world, which helps us to learn about the traditions of other countries, establish friendships or conduct business.

However, simply knowing foreign languages is not enough in modern society. Nowadays, students must have an official qualification that accredits and recognizes their proficiency in a given language. In fact, many schools, universities and companies only accept candidates who have an official qualification based on the Common European Framework of Reference for Languages (CEFR).

“

The ability to communicate effectively in another language, and accredit it with an official CEFR qualification, is an essential requirement for your academic and professional development. TECH helps you achieve it with intensive 100% CEFR training"

TECH Technological University

The Common European Framework of Reference for Languages is the only officially recognized and accredited system for assessing a student's level of proficiency. Although there are other certification systems, these come from private institutions and are, therefore, not officially valid. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH we offer you the only intensive program designed to prepare you to obtain your official certificate based 100% on the CEFR, the only official system recognized and accepted throughout Europe.

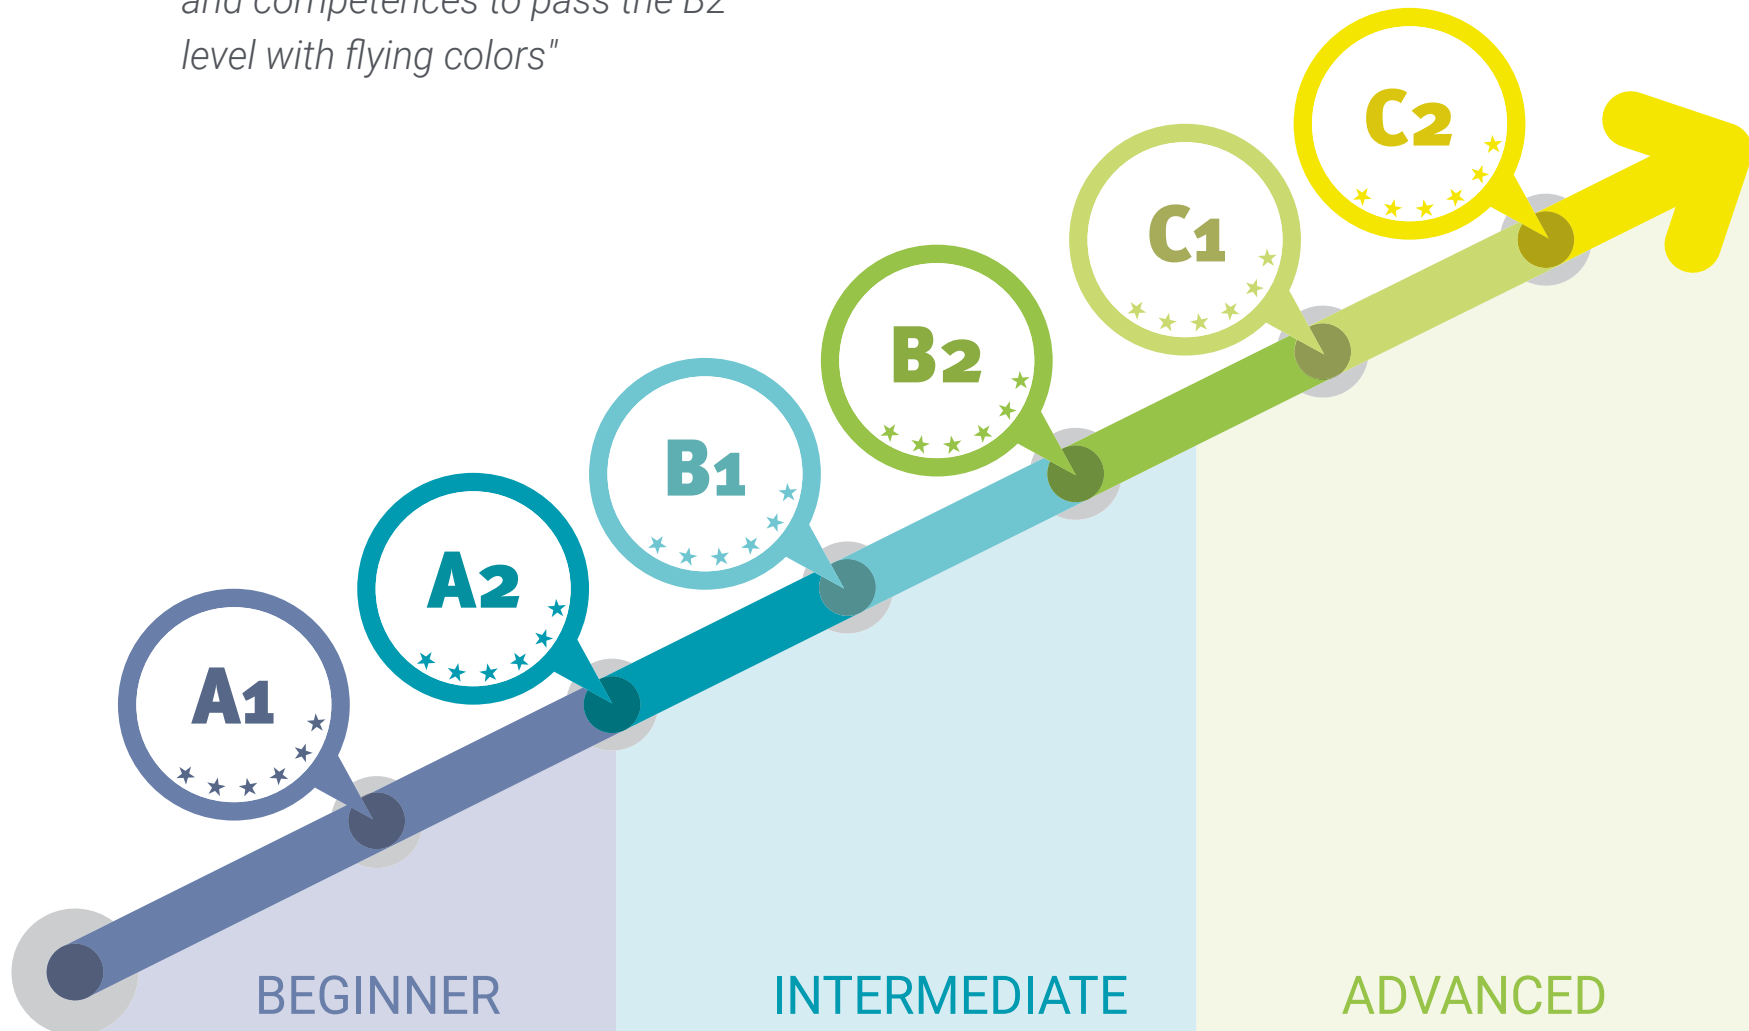

Finally learn to speak fluent Portuguese and make the most of it by accrediting it with an official qualification based on the CEFR.

Other private language certification systems require students to periodically recertify their level of proficiency. The CEFR certificate from TECH provides you with a certificate for life.

“

With this preparation program you will have all the necessary contents and competences to pass the B2 level with flying colors”

03

What Is Level B2?

Level B2 is part of the Independent User Level, which is divided into two sub-levels: First and Second Independent User Level (B1 and B2).

The B2 Level has two main features: the first is the ability to maintain interaction and make oneself understood in a variety of situations, for example: learners generally understand the main ideas of extended discussions around them, provided the speech is clearly articulated at a standard language level; offer and ask for opinions in an informal discussion with friends; clearly express the main idea they want to get across; flexibly use broad, simple language to express much of what they want; are able to carry on a conversation or discussion, but can sometimes be difficult to understand when trying to say exactly what they mean; express themselves understandably, although they pause for some grammatical and lexical planning, and some mistake-correcting is evident, especially in long periods language flow.

B₂

The second feature is the ability to know how to deal flexibly with everyday problems, such as, for example: coping with less common situations in public transport, the typical situations that often arise when making travel reservations through an agency or when traveling; participates in conversations on usual matters without having anticipated it; being able to raise complaints; taking the initiative in an interview or consultation (e.g., knows how to initiate a new topic), although still being noticeably dependent on the interviewer during the interaction; knowing how to ask someone to clarify or develop what he or she has just said.

“

In TECH's B2 Portuguese Individual Online Conversation Classes Program we prepare you thoroughly to obtain your official B2 Portuguese Certificate"

What are the B2 Level Skills?

“

Improve your skills in this language and certify your level quickly and easily thanks to everything you will learn in this excellent program offered by TECH”

01

It is the ability to understand the main ideas in complex texts which deal with both concrete and abstract topics, even if they are of a technical nature, as long as they are within their field of expertise.

02

You can interact with native speakers with a sufficient degree of fluency and naturalness, so that communication is effortless for the interlocutors.

03

You can produce clear and detailed texts on a range of diverse topics, as well as defend your point of view on general topics, indicating the pros and cons or different options.

Our Methodology

The B2 Portuguese Individual Online Conversation Classes course is an intensive and personalized program that enables the student to obtain the B2 Level certificate in Portuguese based 100% on the Common European Framework of Reference for Languages (CEFR). To do this, TECH uses a practice method for oral skills in which students intensively and repeatedly work all the content required by the Framework, along with native university teachers who thoroughly prepare them to pass the test, following the quality and rigor parameters as defined by TECH, the largest digital university in the world.

“

Only TECH can enable you to successfully achieve the CEFR B2 Level in Portuguese in such a short amount of time”

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

TECH's B2 Portuguese Oral Proficiency Preparation Program offers you a method based on interaction and synchronous and direct communication between teacher and student to prepare you to comprehensively prepare for the official oral level certification test. Our objective is to strengthen your skills in a changing, real and multicultural context and, guarantee your success in passing the test. To this end, we emulate the official test using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively for the level certification test.

...All of this is enhanced with the best 100% online teaching methodology: Re-learning...

Our school is the first in the world to combine storytelling with a 100% online learning system based on repetition, which combines different elements that represent an evolution with respect to the simple study and performance of exercises.

TECH offers you the highest quality and quantity in the academic landscape, with hundreds of exercises and resources for you to keep improving your level step by step.

This methodology, at the forefront of world teaching, is called Re-learning. Our language school is the first licensed to employ this successful method, having managed, in 2015, to improve the overall satisfaction levels (teaching quality, quality of materials, course structure, objectives, etc.) of the students who complete the courses with respect to the indicators of the best language courses on the market.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

Re-learning Methodology

We prevent your motivation from waning and offer you the best learning environment.

TECH's intensive oral proficiency preparation program is based on synchronous, real-time communication, as this type of interaction has been proven to enhance personal involvement, work interaction, social-emotional relationships and personal interactions, increasing motivation. (Krasinski, 2008).

...with a personalized and expert-led training itinerary...

In order to promote maximum contact with the Language School, we provide you with a tutor so that you can write essays, receive answers to your questions or get advice on how to study.

“

Our system will allow you to organize your time and learning pace, adapting it to your schedule, and will also allow you to access the contents from any device with an internet connection (computer, tablet, smartphone)”

According to the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. In this way, and in what is called “Neurocognitive - context dependent learning”, the different elements of our Portuguese B2 level preparation course are connected to the context in which the participant will take the official certification exam in order to guarantee success on the day of the test.

Specific Objectives

Sociocultural and Sociolinguistic Competence

- ♦ Broaden and diversify your knowledge of sociocultural aspects of communities where they speak the language, acquiring a natural and confident manner of speaking, which doesn't attract attention nor leads to special treatment, different to that given to native speakers. Furthermore, gain knowledge of how to adjust your behavior, reactions, attitude, message and wording to any changes in situation, style and emphasis
- ♦ Identify the most important aspects of a variety of common formal and informal oral and written registers, and appropriately use the expressions, pronunciation and intonation of the most common registers that you are most in contact with
- ♦ Perceive the differentiating characteristics of the Italian language pattern in relation to other widespread or nearby patterns

Linguistic Competence

- ♦ Manage a wide and varied repertoire of linguistic resources, including complex syntax and textual grammar, in order to approach, with naturalness, precision, clarity and cohesion, texts on a wide range of situations and topics, almost without showing that he/she has to limit what he/she wants to say

- ♦ Possess good command of linguistic resources with very few mistakes. When using complex structures, especially in discourse development, and even more so in oral communication or in less common situations, there are sometimes cohesion or inappropriate register mistakes, as well as sporadic slips or some "resistant" errors in less commonly controlled situations. In these cases the student will be capable of self-correcting

You will effectively use a wide variety of connectors in spoken discourse, optimally relating ideas and concepts"

The Professional Benefits of Portuguese

With approximately 220 million speakers, Portuguese is the sixth most spoken native language and the third most spoken language in the world using the Latin alphabet, after Spanish and English.

Portuguese is the official language of Portugal, where it is spoken by about 10 million people, and of Brazil (Brazilian). It is also the language of administration in Angola, Mozambique, Guinea-Bissau, Cape Verde and Sao Tome and Principe. Other Portuguese enclaves include Goa, East Timor and Macau. It is also spoken in areas of China and India that were colonies of Portugal, as well as in border areas of Argentina, Uruguay and Paraguay.

Portuguese is an emerging language, thanks, among other reasons, to the great economic development of Brazil, where the first language is Portuguese. Brazil is an emerging and very powerful economic power in Latin America, whose position in the world is likely to prosper even more in the coming years.

Starting an international expansion into Brazil may be a possible task for someone who does not know the language, but it is not going to be as fast or as effective compared to someone who is fluent in the language. Brazil represents a market of 190 million inhabitants. Its GDP is almost twice that of Mexico, five times that of Venezuela or Argentina, ten times that of Chile and twelve times that of Peru. The country is also part of the BRIC group (Brazil, Russia, India, China) and is considered the seventh largest economy in the world.

“

Learning the language is one of the keys to developing trust and long-term relationships, which can then materialize in the development of economic or other projects. Any company that aspires to do business in the South American giant will need to have a top executive fluent in Portuguese.”
