# Is it Important to Obtain a Language Certificate?

In today's competitive world, speaking other languages is a key part of our modern culture, helping us to expand our knowledge and interact with people from other parts of the world, which helps us to learn about the traditions of other countries, establish friendships or conduct business.

Nowadays, however, simply knowing foreign languages is not enough. Nowadays, students must have an official qualification that accredits and recognizes their proficiency in a given language. In fact, many schools, universities and companies only accept candidates who have an official qualification based on the Common European Framework of Reference for Languages (CEFR).

“

*The ability to communicate effectively in another language, and accredit it with an official CEFR qualification, is an essential requirement for your academic and professional development. TECH helps you achieve it with intensive 100% CEFR training"*

## TECH Technological University

The Common European Framework of Reference for Languages is the only officially recognized and accredited system for assessing a student's level of proficiency. Although there are other certification systems, these come from private institutions and are, therefore, not officially valid. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH we offer you the only intensive program, designed to prepare you to obtain your official, certificate based 100% on the CEFR, the only official system recognized and accepted throughout Europe.

*Finally learn to speak fluent German and make the most of it by accrediting it with an official qualification based on the CEFR.*

*Other private Language Certificate systems require students to periodically recertify their level of proficiency. TECH's CEFR is valid for life.*

“

*With this program you will have all the content and skills you need to pass the C2”*

03

# What Is Level C2?

Level C2 is part of the Proficient User Level, which is further divided into two sub-levels: First and Second Proficient User Levels (C1 and C2).

Although level C2 has been referred to as Mastery, it does not imply native or near-native proficiency. It is intended to characterize the degree of precision, appropriateness and ease of use in the language that typifies the speech of bright students. The descriptors graded here include: is able, by reasonably employing a wide range of modification mechanisms, to accurately convey subtle nuances of meaning; has a good command of idiomatic and colloquial expressions, and is aware of the connotative level of meaning; knows how to circumvent difficulties so discreetly that the interlocutor hardly notices.

“

*In TECH's Individual Online Conversation Classes program we will thoroughly prepare you to obtain your official C2 German certificate”*

What are the C2 Level Skills?

01

Can easily understand virtually everything he/she hears or reads

02

Can reconstruct information and arguments from various sources, whether in spoken or written language, and present them in a coherent and summarized manner

“

*Improve your skills in this language and certify your level quickly and easily, thanks to everything you will learn in this excellent program offered by TECH”*

03

Can express him/herself spontaneously, with great fluency and with a degree of precision that allows him/her to differentiate fine nuances in meaning even in more complex situations

# Our Methodology

During this C2 German individual online conversation classes program, you will enjoy intensive work sessions that will prepare you to certify your German level based 100% on the Common European Framework of Reference for Languages (CEFR). For this purpose, we use a method of oral proficiency practice, in which the student works intensively and repeatedly on all the contents required by the framework, providing them with extensive preparation to pass the test.

“

*You will study using a unique and highly effective methodology that will prepare you to take the Common European Framework of Reference for Languages (CEFR) C2 level exam"*

Conventional methods of teaching a second language, such as demonstrative classes or mechanical exercises, slow down learning and seriously affect student motivation, as confirmed by statistical data reflecting the failure of the traditional system and methodology.

TECH's German Level C2 oral proficiency preparation program offers you a method based on interaction and synchronous and direct communication between teacher and student to comprehensively prepare for the official oral level certification test. Our objective is to strengthen your skills in a changing, real, multicultural context and to guarantee your success in passing the test. To this end, we emulate the official test using mock tests throughout the course.

The student will learn through activities, stories and real contexts, the resolution of everyday and basic communication situations in simulated learning environments and will face real mock exams to prepare intensively, for the level certification test.

Our school is the first in the world to combine *storytelling* with a 100% online

*...All of this is enhanced with the best 100% online teaching methodology: Re-learning...*

learning system based on repetition, which combines different elements that represent an evolution with respect to the simple study and performance of exercises.

*TECH offers you the highest quality and quantity in the academic landscape, with hundreds of exercises and resources for you to keep improving your level step by step.*

This methodology, at the forefront of world teaching, is called *Re-learning*. Our language school is the first licensed to employ this successful method, having managed, in 2015, to improve the overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...,) of the students who complete the courses, with respect to the indicators of the best language courses on the market.

*The overall score obtained by our learning system is 8.01, according to the highest international standards.*

**Re-Learning Methodology**

We prevent your motivation from waning and offer you the best learning environment.

TECH's intensive individual online conversation classes program is based on synchronous communication, in real time, as this type of interaction is proven to reinforce personal participation, work interaction, social-emotional relationships and personal interactions, increasing motivation. (Hrastinski, 2008).

*...with a personalized and expert-led training itinerary...*

In order to promote maximum contact with the Language School, we provide you with a tutor so that you can write essays, receive answers to your questions or get advice on how to study.

*Our system will allow you to organize your time and learning pace, adapting it to your schedule and will also allow you to access the contents from any device with an internet connection (computer, tablet, smartphone)”*

According to the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images, memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus and retain it in our long-term memory. In this way, and in what is called *Neurocognitive context-dependent learning* the different elements of our intensive C2 German Individual Online Conversation Classes are connected to the context in which the participant will take their official certification exam in order to guarantee success on the day of the test.

# The Professional Benefits of German

German is the ninth most spoken language in the world. It is spoken in countries such as Switzerland, Austria, Luxembourg, Belgium and also in other parts of the world in small communities.

There is no doubt that the main reason to learn German is for work. Austria has the lowest unemployment rate of the Eurozone countries; Switzerland is one of the richest countries with the best working conditions; the engine of Europe, Germany, offers great job opportunities to anyone who wants to work, but a good command of German is a prerequisite to work in these countries. Many have tried their luck and emigrated from their home countries in search of work, but doing it without knowing German is not particularly easy.

Knowing this will also make it easier to create or maintain working relationships with German-speaking partners from your country and will certainly help to strengthen ties and close business deals. It is also worth bearing in mind that German is the native language of one of the world's major exporting countries, and having a good command of this language allows you to perform better in business and instill greater confidence in working relationships.

Additionally, German is the second most important language for the sciences and Germany is the third most important country for its contribution to research and development. Germany awards a large number of research grants to foreign scientists and almost 20% of the world's books are written in German.

“

*German is the native language of one of the world's major exporting countries, and having a good command of this language allows you to perform better in business”*

11

# Assessment and Certification

The main evaluation objective of TECH'S assessment is that students consolidate what they have learned and are aware of their progress. That is why, after completing each block, the student is shown a results report that visually indicates the skills that they should reinforce in the online classes.

“

*TECH'S C2 level oral communication skills preparation program is the only one that also awards you with a university certificate”*

## Certification

At the end of the course the student will receive a certificate of recognition that confirms that they are prepared to obtain official certification for this level.
