01 Welcome

With these Individual Conversation Classes at TECH, students take their mastery of the Portuguese language to expert level, training themselves in the oral management of the language. Thanks to this program compiled by native university professors, experts in teaching Portuguese, you will learn all areas of language use: grammar, vocabulary, formal and colloquial expression, writing and reading at a practically native level of comprehension. As a result, they will have the skills required to pass the C2 Portuguese test in the Common European Framework of Reference for Languages (CEFR).

The student is one step away from achieving the last level of language learning. Thanks to these personalized conversation classes at TECH, their language skills will be put to the test and they will be able to master the language thanks to the online classes provided by TECH. The objective of this course, is therefore to help the student acquire the last set of skills they need to express themselves in Portuguese like a native. This will allow them to obtain the certification they are searching for.

“

Achieve your C2 level Portuguese in record time thanks to TECH's methodology”

Introduction

Most Portuguese language schools and academies offer traditional teaching, based on the repetition of simple linguistic structures with no connection to properly structured content or concrete skills. However, teachers and psychologists believe that the best way to stimulate language learning is not to subject the learner to formalized, linear learning - for example, with rote learning - but rather, to encourage imagination and learning through sensory exploration in order to be able to understand and interpret what is around us.

This allows the brain to work and learn a second language in the most natural way possible, in the same way that we learned our mother tongue. For this reason, TECH offers C2 Portuguese Individual Conversation Classes in a totally personalized way, with native university teachers and native speakers, who will provide both common and specific communicative situations, in an individual and 100% online way. In this way students will master the structure of the Portuguese language in its Brazilian form and will be able to maintain conversations on an expert and practically native level.

We have the broadest and most complete syllabus on the market: it includes the 51 specific topics required by the CEFR for C2.

Acquire the communicative skills you need to obtain the CEFR Level C2 Portuguese quickly and easily, thanks to TECH.

02

Is it Important to Obtain a Language Certificate?

In today's competitive world, speaking other languages is a key part of our modern culture, helping us to expand our knowledge and interact with people from other parts of the world, which helps us to learn about the traditions of other countries, establish friendships or conduct business.

However, simply knowing foreign languages is not enough in modern society.

Nowadays, students must have an official qualification that accredits and recognizes their proficiency in a given language. In fact, many schools, universities and companies **only** accept candidates who have an official qualification based on the **Common European Framework of Reference for Languages (CEFR)**.

“

The ability to communicate effectively in another language, and accredit it with an official CEFR qualification, is an essential requirement for your academic and professional development. TECH helps you achieve it with intensive 100% CEFR training"

TECH Technological University

The Common European Framework of Reference for Languages is the **only officially recognized and accredited system for assessing a student's level of proficiency**. Although there are other certification systems, these come from private institutions and are, therefore, **not officially valid**. The CEFR establishes a single criterion to determine the difficulty of the courses and awards certificates that are recognized throughout the European Union.

At TECH we offer you the only intensive program designed to prepare you to obtain your official certificate based 100% on the CEFR, the only official system recognized and accepted throughout Europe.

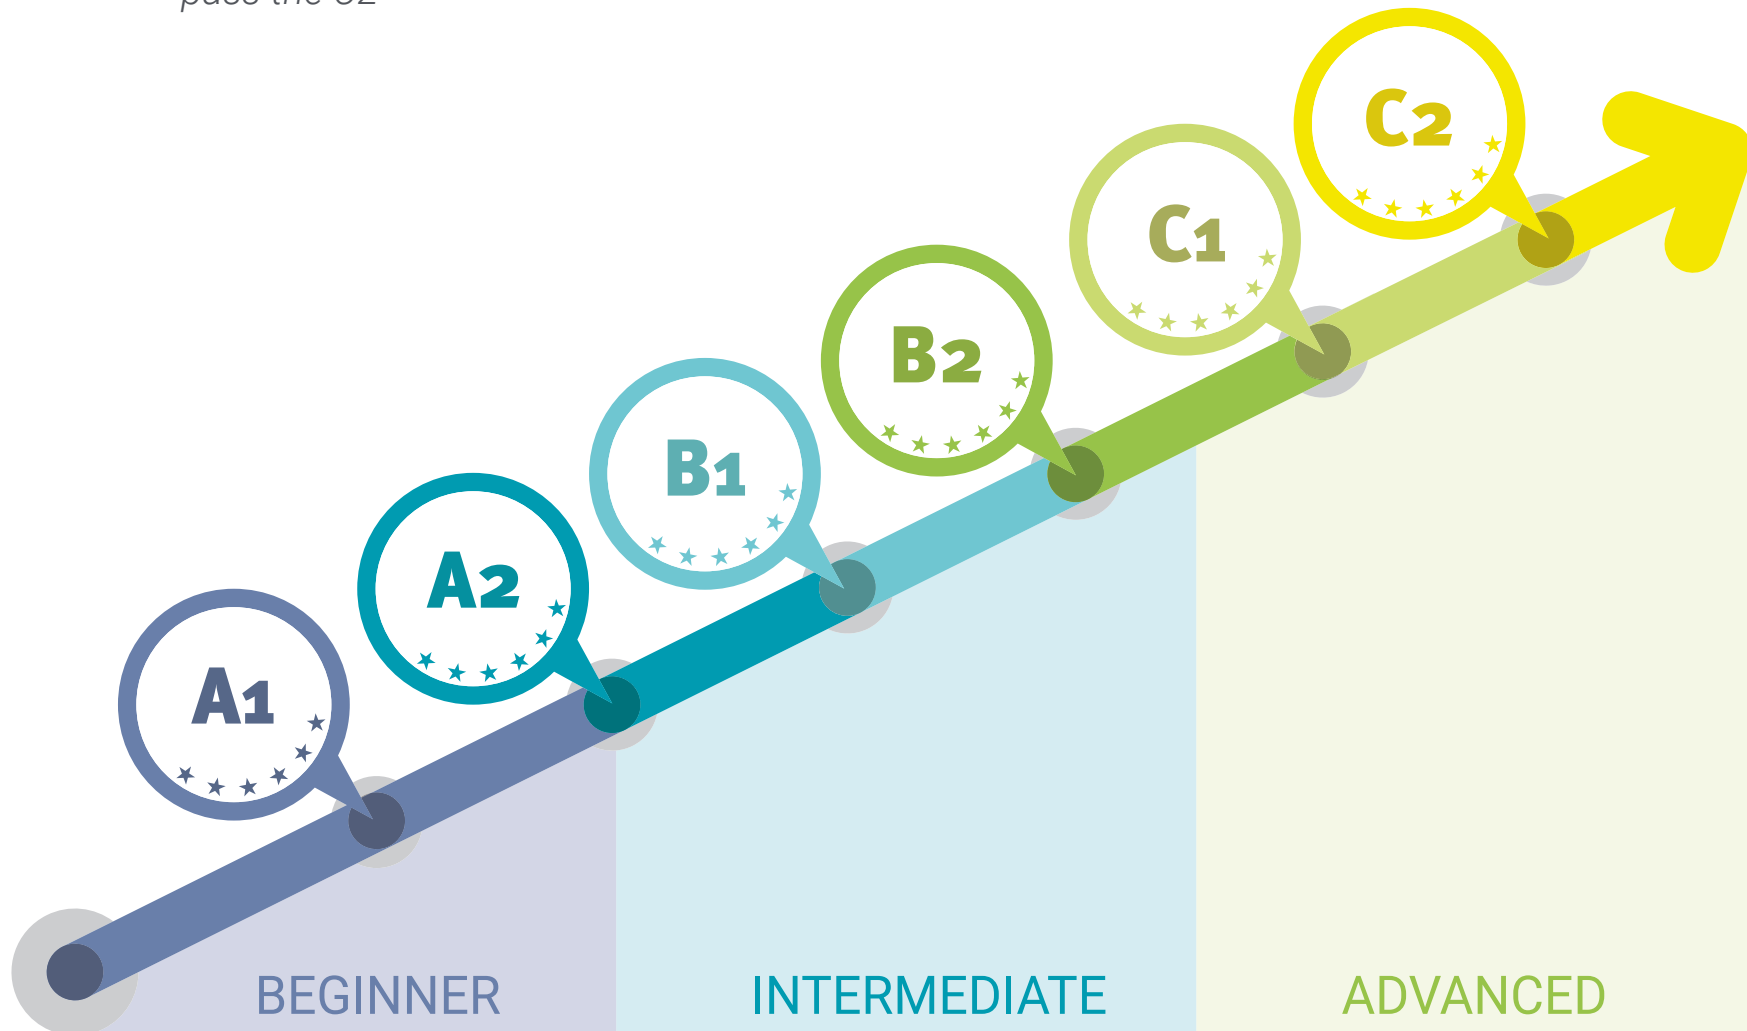

Finally learn to speak fluent Portuguese and make the most of it by accrediting it with an official qualification based on the CEFR.

Other private language certification systems require students to periodically recertify their level of proficiency. The CEFR certificate from TECH provides you with a certificate for life.

“

With this program you will have all the content and skills you need to pass the C2”

03

What Is Level C2?

Level C2 is part of the Proficient User Level, which is further divided into two sub-levels: First and Second Proficient User Levels (C1 and C2).

Although level C2 has been referred to as Mastery, it does not imply native or near-native proficiency. It is intended to characterize the degree of precision, appropriateness and ease of use in the language that typifies the speech of bright students. The descriptors graded here include: is able, by reasonably employing a wide range of modification mechanisms, to accurately convey subtle nuances of meaning; has a good command of idiomatic and colloquial expressions, and is aware of the connotative level of meaning; knows how to circumvent difficulties so discreetly that the interlocutor hardly notices.

“

In TECH's Individual Online Conversation Classes Program for C2 Level Preparation in Portuguese we prepare you thoroughly to obtain your official C2 Portuguese Certificate"

What are the C2 Level Skills?

At this level, as defined by the Common European Framework of Reference for Languages, students progress in language skills to develop what are considered "Basic User" skills with the ability to:

“

Improve your skills in this language and certify your level quickly and easily thanks to everything you will learn in this excellent program offered by TECH”

01

02

Can reconstruct information and arguments from various sources, whether in spoken or written language, and present them in a coherent and summarized manner

The Professional Benefits of Portuguese

With approximately 220 million speakers, Portuguese is the sixth most spoken native language and the third most spoken language in the world using the Latin alphabet, after Spanish and English.

Portuguese is the official language of Portugal, where it is spoken by about 10 million people, and of Brazil (Brazilian). It is also the language of administration in Angola, Mozambique, Guinea-Bissau, Cape Verde and Sao Tome and Principe. Other Portuguese enclaves include Goa, East Timor and Macau. It is also spoken in areas of China and India that were colonies of Portugal, as well as in border areas of Argentina, Uruguay and Paraguay.

Portuguese is an emerging language, thanks, among other reasons, to the great economic development of Brazil, where the first language is Portuguese. Brazil is an emerging and very powerful economic power in Latin America, whose position in the world is likely to prosper even more in the coming years.

Starting an international expansion into Brazil may be a possible task for someone who does not know the language, but it is not going to be as fast or as effective compared to someone who is fluent in the language. Brazil represents a market of 190 million inhabitants. Its GDP is almost twice that of Mexico, five times that of Venezuela or Argentina, ten times that of Chile and twelve times that of Peru. The country is also part of the BRIC group (Brazil, Russia, India, China) and is considered the seventh largest economy in the world.

“

Learning the language is one of the keys to developing trust and long-term relationships, which can then materialize in the development of economic or other projects. Any company that aspires to do business in the South American giant will need to have a top executive fluent in Portuguese”

11

Assessment and Certification

The main evaluation objective of TECH's assessment is that students consolidate what they have learned and are aware of their progress. That is why, after completing each block, the student is shown a results report that visually indicates the skills that they should reinforce in the online classes.

“

TECH'S C2 level oral communication skills preparation program is the only one that also awards you with a university certificate”

Certification

Upon completion of the course, the student will receive a certificate of recognition that will guarantee their preparation to obtain, if the student wishes, the certification of that level.
