Introduction

Football is a discipline that requires planning and strategy. Therefore, tactics are essential for a team to gain an advantage over its opponent by analyzing its weaknesses and influential players. This process is achieved through the organization and execution of a specific strategy to take advantage of individual and collective strengths. As such, the presence of a professional trained in football tactics is fundamental for the achievement of sporting objectives. This has prompted TECH Technological University to create this 100% online program, so that students can be trained in a field which has great future prospects. This is carried out via audio-visual resources, complementary readings and practical exercises.

“

*You will become a specialist in
formulating game models, applying
the various systems of attack and
defense on the pitch to your team”*

Tactics in football consists in deciding on the formation of the team, the style of play, the position and roles of the players on the pitch, as well as the specific instructions for each of these areas. This task can only be performed by a professional with extensive expertise in sports strategy, who also knows how to analyze the game systems of the different teams, both their own and those of their opponent.

For this reason, TECH Technological University has created this Postgraduate Certificate with the aim of training students in a fast-growing sector with huge prospects due to the prominence that football has had throughout history. This is a 100% online Postgraduate Certificate, which can be accessed from any device with an Internet connection, removing the need to attend classes or travel to educational centers.

Another advantage of this program is that it uses the Relearning methodology, focused on repetition and experience, replacing the conventional model of learning by memory. In addition, it contains high-impact audiovisual materials developed by experts and specialists in the world of football, thus guaranteeing a unique training opportunity according to the needs of the professional.

This **Postgraduate Certificate in Game Tactics in Football** contains the most complete and up-to-date scientific program on the market. The most important features include:

- ♦ The development of case studies presented by experts in football game tactics
- ♦ The graphic, schematic, and practical contents with which they are created, provide practical information on the disciplines that are essential for professional practice
- ♦ Practical exercises where self-assessment can be used to improve learning
- ♦ Its special emphasis on innovative methodologies
- ♦ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ♦ Content that is accessible from any fixed or portable device with an Internet connection

You will learn the basic principles of offense and defense through real cases and simulation, thus having a first-hand experience of new demands within the field"

“

The study program has been designed following the academic demands required by the sports sector”

The program's teaching staff includes professionals from sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

Its multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive education programmed to learn in real situations.

The design of this program focuses on Problem-Based Learning, by means of which the professional must try to solve the different professional practice situations that are presented throughout the academic course. For this purpose, the student will be assisted by an innovative interactive video system created by renowned experts.

This program will become one of the most important stepping stones in your professional career.

This Postgraduate Certificate is based on the innovative Relearning learning model, so you will learn as you go, and you will be exposed to both real and simulated cases.

02 Objectives

To enable the professional to improve their skills in the development of sports tactics for the world of football, TECH Technological University has compiled a highly informative study program with practical activities that simulate the challenges of the work environment. In addition to this, this program adopts the Relearning methodology, based on repetition and experience, developed specifically to expose the professional to real cases and simulated cases, allowing them to acquire new skills.

“

Upon completion of this Postgraduate Certificate you will be one step closer to your professional goals”

General Objectives

- Understand the origin, history and evolution of football
- Explore the organization of a club and everything pertaining to the sporting environment
- Strengthen your knowledge in current technical-tactical skills
- Examine the changes in football analysis with the introduction of new technologies
- Describe physical training and re-training as a fundamental part of present-day football
- Highlight the importance of good nutrition to enable a good sports performance
- Identify each member of the coaching staff and their roles in a football club
- Explore psychology as a fundamental part of a football player's performance

Specific Objectives

- ♦ Master the different tactical concepts
- ♦ Explore the different concepts to achieve a better tactical vision
- ♦ Expand and improve tactical knowledge
- ♦ Gain tactical skills and adapt them to the different situations that arise during the game
- ♦ Acquire tactical reasoning, enabling an understanding of how to cope with different scenarios during the game, from their own team and from that of the opposition

You will develop different activities in the virtual campus that will lead you to enhance your professional skills"

03

Course Management

One of TECH's main priorities in creating a degree program is the formation of a teaching staff that ensures first-rate knowledge. For this reason, for the preparation of this Certificate, it has selected a team of teaching staff who are professionally active within the field and with several years of experience in football sports tactics. They have worked together and included their professional expertise in the course program, providing the student with an experience of valuable benefit for the development of their career.

“

Leading professionals within the field have come together in the same program to provide you with the fundamentals in football tactics”

Management

Mr. Ángel Fernández Fernández

- ♦ Scout and manager for the northern area for the Athlete Management Group (PHSport)
- ♦ Futsal and football coach
- ♦ Scout for the Asturias area for the Athlete Management Group (Vilasports)
- ♦ Sports Director of CD Mosconia
- ♦ Commentator for Real Oviedo in RadioGed
- ♦ Sports Technician, Middle Grade, specializing in football at the "Asturian Sports School" Levels 1 and 2

Mr. Sergio González Arganda

- ♦ Physiotherapist at Atlético de Madrid Football Club
- ♦ Lecturer for the Master's in Physical Preparation and Sports Rehabilitation in Football at UNIR
- ♦ University Expert in Clinical Pilates at the University of Jaén
- ♦ Master's Degree in Biomechanics Applied to Injury Assessment from Comillas Pontifical University
- ♦ Master's in Osteopathy of the Locomotor System from Madrid School of Osteopathy
- ♦ Expert in Pilates Rehabilitation from the Royal Spanish Gymnastics Federation
- ♦ Master's in Sports and Physical Activity Physiotherapy from Comillas Pontifical University
- ♦ Certificate in Physiotherapy for Physio Training

Professors

Mr. José Rodríguez Suárez

- ♦ Football Manager and Coach
- ♦ Football Coach in various Real Oviedo and Real Oviedo women's grassroots categories
- ♦ Physical Education Teacher in Primary Education
- ♦ Graduate in Teaching, specializing in Physical Education from the University of Oviedo
- ♦ Certificate in National in Level III
- ♦ High-Level Technician in Sports Coaching

04

Structure and Content

The syllabus of this program has been designed by TECH Technological University following the requirements of the current professional field. Therefore, the professional will discover an updated and rigorous study program, which is presented via audiovisual resources, complementary readings and practical exercises. This content will be available on the virtual campus, which can be accessed from any device with an Internet connection, and will be available 24 hours a day.

“

Follow this certificate at your convenience, without having to go to an on-site center or attend classes”

Module 1. Tactics in football

- 1.1. Are tactics and strategy one and the same? Theoretical Framework
 - 1.1.1. Definition of basic concepts
 - 1.1.2. Fundamental principles of the game
 - 1.1.3. Different tactical variants
 - 1.1.4. Differences and similarities
- 1.2. Offensive principles
 - 1.2.1. Definition
 - 1.2.2. Individual
 - 1.2.3. Collective
 - 1.2.4. Education
- 1.3. Offensive principles
 - 1.3.1. Definition
 - 1.3.2. Individual
 - 1.3.3. Collective
 - 1.3.4. Education
- 1.4. Factors influencing the game
 - 1.4.1. Anthropometrics and driving forces
 - 1.4.2. Psychological and psychosocial
 - 1.4.3. Biological and cognitive
 - 1.4.4. Strategy and communication
- 1.5. Game systems
 - 1.5.1. Characteristics and evolution of each system
 - 1.5.2. Advantages and disadvantages of each system
 - 1.5.3. Defensive concepts and add-ons
 - 1.5.4. Defensive concepts and add-ons
- 1.6. Game scenarios
 - 1.6.1. Offensive scenarios
 - 1.6.2. Defensive scenarios
 - 1.6.3. Attack – defense transition
 - 1.6.4. Defense – attack transition

- 1.7. Address and neutralize tactical principles
 - 1.7.1. Definition
 - 1.7.2. Individual
 - 1.7.3. Collective
 - 1.7.4. Education
- 1.8. Game model
 - 1.8.1. Idea of the game. Coach's trademarks
 - 1.8.2. Factors that influence the creation of the game model
 - 1.8.3. Types of game models
 - 1.8.4. Development and characteristics of "MY" game model
- 1.9. Tactical periodization
 - 1.9.1. Methodological principles
 - 1.9.2. Morphocycle pattern and sub-dynamics
 - 1.9.3. Development of morphocycles throughout a season
 - 1.9.4. Creating activities from tactical periodization
- 1.10. Strategy. Set pieces actions
 - 1.10.1. Offensive strategy
 - 1.10.2. Defensive strategy
 - 1.10.3. Training set pieces
 - 1.10.4. Selection of actions according to the type of football player

“

You will stand out in a booming sector with great projection towards the future and with great opportunities at an international level”

05 Study Methodology

TECH is the world's first university to combine the **case study** methodology with **Relearning**, a 100% online learning system based on guided repetition.

This disruptive pedagogical strategy has been conceived to offer professionals the opportunity to update their knowledge and develop their skills in an intensive and rigorous way. A learning model that places students at the center of the educational process giving them the leading role, adapting to their needs and leaving aside more conventional methodologies.

“

TECH will prepare you to face new challenges in uncertain environments and achieve success in your career”

The student: the priority of all TECH programs

In TECH's study methodology, the student is the main protagonist.

The teaching tools of each program have been selected taking into account the demands of time, availability and academic rigor that, today, not only students demand but also the most competitive positions in the market.

With TECH's asynchronous educational model, it is students who choose the time they dedicate to study, how they decide to establish their routines, and all this from the comfort of the electronic device of their choice. The student will not have to participate in live classes, which in many cases they will not be able to attend. The learning activities will be done when it is convenient for them. They can always decide when and from where they want to study.

“

*At TECH you will NOT have live classes
(which you might not be able to attend)”*

The most comprehensive study plans at the international level

TECH is distinguished by offering the most complete academic itineraries on the university scene. This comprehensiveness is achieved through the creation of syllabi that not only cover the essential knowledge, but also the most recent innovations in each area.

By being constantly up to date, these programs allow students to keep up with market changes and acquire the skills most valued by employers. In this way, those who complete their studies at TECH receive a comprehensive education that provides them with a notable competitive advantage to further their careers.

And what's more, they will be able to do so from any device, pc, tablet or smartphone.

“*TECH's model is asynchronous, so it allows you to study with your pc, tablet or your smartphone wherever you want, whenever you want and for as long as you want*”

Case Studies and Case Method

The case method has been the learning system most used by the world's best business schools. Developed in 1912 so that law students would not only learn the law based on theoretical content, its function was also to present them with real complex situations. In this way, they could make informed decisions and value judgments about how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

With this teaching model, it is students themselves who build their professional competence through strategies such as Learning by Doing or Design Thinking, used by other renowned institutions such as Yale or Stanford.

This action-oriented method will be applied throughout the entire academic itinerary that the student undertakes with TECH. Students will be confronted with multiple real-life situations and will have to integrate knowledge, research, discuss and defend their ideas and decisions. All this with the premise of answering the question of how they would act when facing specific events of complexity in their daily work.

Relearning Methodology

At TECH, case studies are enhanced with the best 100% online teaching method: Relearning.

This method breaks with traditional teaching techniques to put the student at the center of the equation, providing the best content in different formats. In this way, it manages to review and reiterate the key concepts of each subject and learn to apply them in a real context.

In the same line, and according to multiple scientific researches, reiteration is the best way to learn. For this reason, TECH offers between 8 and 16 repetitions of each key concept within the same lesson, presented in a different way, with the objective of ensuring that the knowledge is completely consolidated during the study process.

Relearning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success.

A 100% online Virtual Campus with the best teaching resources

In order to apply its methodology effectively, TECH focuses on providing graduates with teaching materials in different formats: texts, interactive videos, illustrations and knowledge maps, among others. All of them are designed by qualified teachers who focus their work on combining real cases with the resolution of complex situations through simulation, the study of contexts applied to each professional career and learning based on repetition, through audios, presentations, animations, images, etc.

The latest scientific evidence in the field of Neuroscience points to the importance of taking into account the place and context where the content is accessed before starting a new learning process. Being able to adjust these variables in a personalized way helps people to remember and store knowledge in the hippocampus to retain it in the long term. This is a model called Neurocognitive context-dependent e-learning that is consciously applied in this university qualification.

In order to facilitate tutor-student contact as much as possible, you will have a wide range of communication possibilities, both in real time and delayed (internal messaging, telephone answering service, email contact with the technical secretary, chat and videoconferences).

Likewise, this very complete Virtual Campus will allow TECH students to organize their study schedules according to their personal availability or work obligations. In this way, they will have global control of the academic content and teaching tools, based on their fast-paced professional update.

The online study mode of this program will allow you to organize your time and learning pace, adapting it to your schedule”

The effectiveness of the method is justified by four fundamental achievements:

1. Students who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity, through exercises that assess real situations and the application of knowledge.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. Students like to feel that the effort they put into their studies is worthwhile. This then translates into a greater interest in learning and more time dedicated to working on the course.

The university methodology top-rated by its students

The results of this innovative teaching model can be seen in the overall satisfaction levels of TECH graduates.

The students' assessment of the teaching quality, the quality of the materials, the structure of the program and its objectives is excellent. Not surprisingly, the institution became the top-rated university by its students according to the global score index, obtaining a 4.9 out of 5.

Access the study contents from any device with an Internet connection (computer, tablet, smartphone) thanks to the fact that TECH is at the forefront of technology and teaching.

You will be able to learn with the advantages that come with having access to simulated learning environments and the learning by observation approach, that is, Learning from an expert.

As such, the best educational materials, thoroughly prepared, will be available in this program:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

Practicing Skills and Abilities

You will carry out activities to develop specific competencies and skills in each thematic field. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop within the framework of the globalization we live in.

Interactive Summaries

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents, international guides... In our virtual library you will have access to everything you need to complete your education.

06 Certificate

The Postgraduate Certificate in Game Tactics in Football guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Global University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This private qualification will allow you to obtain a **Postgraduate Certificate in Game Tactics in Football** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra ([official bulletin](#)). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** private qualification is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.
