01

Introduction

This program will address the main tumors affecting the endocrine system, mammary tumors and ophthalmologic tumors in dogs and cats. The surgical techniques that can be used to surgically treat these diseases will be developed, as well

A unique opportunity to specialise in a high-demand professional field

“

Become one of the most demanded professionals today: Specialize in Endocrine System, Mammary and Ophthalmologic Tumors with this complete online Postgraduate Certificate”

Oncological diseases affecting the endocrine system are adrenal gland, thyroid gland, exocrine pancreas and pituitary gland tumors. In these topics, special attention will be given to the diagnosis and therapeutic alternatives presented in these types of tumors. Techniques to surgically treat these tumors will be detailed, as well as the perioperative considerations that must be taken into account

Students will address several topics on mammary surgical oncology so diagnostic and therapeutic protocols will be generated where surgical guidelines; and issues to improve postoperative quality of life of these patients will be established

Finally, this program will define the main ophthalmic tumors affecting dogs and cats and will analyze the medical and surgical approach that can be performed in patients suffering from this type of tumors. The enucleation technique for surgical resolution of ophthalmic tumors will also be described

As it is an online Postgraduate Certificate, students are not conditioned by fixed schedules, nor do they need to commute to another location. All of the content can be accessed at any time of the day, so you can balance your working or personal life with your academic life

“ You will have the experience of expert professionals who will contribute their experience in this area to the programme, making this training a unique opportunity for professional growth”

This **Postgraduate Certificate in Endocrine System, Mammary and Ophthalmologic Tumors** contains the most complete and up-to-date educational program on the market. The most important features include:

- » The latest technology in online teaching software
- » A highly visual teaching system, supported by graphic and schematic contents that are easy to assimilate and understand
- » Practical cases presented by practising experts
- » State-of-the-art interactive video systems
- » Teaching supported by telepractice
- » Continuous updating and recycling systems
- » Autonomous learning: full compatibility with other occupations
- » Practical exercises for self-evaluation and learning verification
- » Support groups and educational synergies: questions to the expert, debate and knowledge forums
- » Communication with the teacher and individual reflection work
- » Content that is accessible from any fixed or portable device with an Internet connection
- » Complementary documentation banks permanently available, even after the Postgraduate Certificate

“

Get a complete and suitable qualification in Endocrine System, Mammary and Ophthalmologic Tumors with this highly effective Postgraduate Certificate and open new paths for your professional progress”

Our teaching staff is made up of professionals from different fields related to this specialty. That way, TECH ensures to offer the updating objective it intends to provide. A multidisciplinary team of professionals trained and experienced in different environments, who will cover the theoretical knowledge in an efficient way, but, above all, will bring the practical knowledge from their own experience to the course: one of the differential qualities of this course

This mastery of the subject is complemented by the effectiveness of the methodology used throughout this Postgraduate Certificate in Endocrine System, Mammary and Ophthalmologic Tumors developed by a multidisciplinary team of *e-learning* experts, which integrates the latest advances in educational technology. That way, students will study with a range of easy-to-use and versatile multimedia tools that will give them the necessary skills needed during training

The design of this program is based on Problem-Based Learning: an approach that views learning as a highly practical process. To achieve this remotely, TECH will use telepractice: with the help of an innovative interactive video system and *Learning from an Expert*, the student will be able to acquire the knowledge as if they were facing the scenario they are learning at that moment. A concept that will allow students to integrate and memorize what they have learnt in a more realistic and permanent way

Our innovative telepractice concept will give you the opportunity to learn through an immersive experience, which will provide you with a faster integration and a much more realistic view of the contents:
“Learning from an expert”

02 Objectives

The objective is to train highly qualified professionals for work experience. An objective that is complemented, moreover, in a global manner, by promoting human development that lays the foundations for a better society. This objective is focused on helping medical professionals reach a much higher level of expertise and control. A goal that, in just a few months, can be achieved with a high intensity and precision Postgraduate Certificate

A close-up photograph of a medical procedure, likely a tattoo or a cosmetic injection. A hand is holding a skin graft or a similar medical device, and a needle is being used to inject a substance into it. The background is a teal gradient.

“

If your objective is to broaden your skills set to include new paths of success and development: this is the Postgraduate Certificate for you: a training that aspires to excellence"

General Objectives

- » Develop action protocols for the main endocrine tumors in dogs and cats
- » Evaluate the diagnostic and therapeutic approach to canine mammary tumors
- » Analyze the main ophthalmological tumors in dogs and cats, as well as the diagnostic evaluation and therapeutic approach to these types of tumors
- » Present classical methods, as well as the most advanced and novel techniques for the surgical approach to endocrine, mammary and ocular tumors

A path to achieve development and professional growth that will propel you towards a greater level of competitiveness in the employment market"

Specific Objectives

- » Generate diagnostic and therapeutic protocols for the main pituitary, adrenal and thyroid gland and exocrine pancreas tumors in dogs and cats
- » Establish clear, patient-based recommendations on the therapeutic alternatives for pituitary, adrenal, thyroid and exocrine pancreas tumors in dogs and cats
- » Develop, in detail, the techniques involved in the surgical approach to pituitary, adrenal and thyroid gland and exocrine pancreas tumors in dogs and cats potential complications
- » Compile the information available on the therapy of chronic degenerative valve disease
- » Propose protocols for making decisions in breast oncology
- » Define the risk factors associated with the occurrence and prognosis of canine and feline mammary tumors
- » Demonstrate the importance of peri-operative care of patients with breast tumors
- » Establish action protocols for the main canine and feline ophthalmologic tumors

03

Course Management

For our course to be of the highest quality, we are proud to work with a teaching staff of the highest level, chosen for their proven track record. Professionals from different areas and fields of expertise that make up a complete, multidisciplinary team. A unique opportunity to learn from the best

“

A unique opportunity to learn from internationally renowned professors, with teaching, clinical and research experience”

Management

Dr. Ortiz Díez, Gustavo

- ♦ Head of Small Animal Department, Complutense Clinical Veterinary Hospital.
- ♦ Associate Professor, Department of Animal Medicine and Surgery, Faculty of Veterinary Medicine, Complutense University of Madrid
- ♦ PhD and Undergraduate Degree in Veterinary Medicine from the UCM.
- ♦ Graduate in Psychology, UNED (2020)
- ♦ AVEPA Accredited Soft Tissue Surgery
- ♦ Member of the scientific committee and current president of GECIRA (AVEPA's Soft Tissue Surgery Specialty Group).
- ♦ Master's Degree in Research Methodology in Health Sciences from the UAB.
- ♦ Specialist in Traumatology and Orthopedic Surgery in Companion Animals by the UCM. Degree in Small Animal Cardiology from the UCM.
- ♦ Courses of laparoscopic and thoracoscopic surgery at the Minimally Invasive Center Jesús Usón. Accredited in functions B, C, D and E of Experimentation Animals, Community of Madrid
- ♦ Degree in Emotional Intelligence, UR Completed training in Gestalt psychology
- ♦ ICT Competencies Course for Teachers, UNED.

04

Structure and Content

The contents of this Postgraduate Certificate have been developed by the different experts on the course, with a clear purpose: to ensure our students acquire each and every one of the necessary skills to become true experts in this field

A complete and well-structured program that will take you to the highest standards of quality and success

“

*A comprehensive and well-structured
program that will take you to the highest
standards of quality and success”*

Module 1. Endocrine System Tumors. Breast Tumors: Ophthalmologic Tumors

- 1.1. Endocrine System Tumors (I): Adrenal Glands
 - 1.1.1. Epidemiology
 - 1.1.2. Diagnosis
 - 1.1.3. Treatment
- 1.2. Endocrine System Tumors (II): Thyroid
 - 1.2.1. Epidemiology
 - 1.2.2. Diagnosis
 - 1.2.3. Treatment
- 1.3. Endocrine System Tumors (III): Insulinoma
 - 1.3.1. Epidemiology
 - 1.3.2. Diagnosis
 - 1.3.3. Treatment
- 1.4. Endocrine System Tumors (IV): Pituitary Tumors
 - 1.4.1. Epidemiology
 - 1.4.2. Diagnosis
 - 1.4.3. Treatment
- 1.5. Endocrine Surgery
 - 1.5.1. Adrenal Surgery
 - 1.5.2. Thyroid Surgery
 - 1.5.3. Pancreas Surgery
- 1.6. Breast Tumors: Canines (I)
 - 1.6.1. Epidemiology
 - 1.6.2. Risk Factors
 - 1.6.3. Diagnosis
- 1.7. Breast Tumors: Canines (II)
 - 1.7.1. Surgical Management
 - 1.7.2. Medical Treatment
 - 1.7.3. Prognosis

- 1.8. Breast Tumors: Felines (III)
 - 1.8.1. Epidemiology
 - 1.8.2. Diagnosis
 - 1.8.3. Treatment
- 1.9. Ophthalmologic Tract Tumors (I)
 - 1.9.1. Epidemiology
 - 1.9.2. Clinical Diagnosis
 - 1.9.3. Complementary Tests
- 1.10. Ophthalmologic Tract Tumors (II)
 - 1.10.1. Surgical Management
 - 1.10.2. Medical Treatment

A comprehensive teaching program, structured in well-developed didactic units, oriented toward learning that is compatible with your personal and professional life"

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program you will be presented with multiple simulated clinical cases based on real patients, where you will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, in an attempt to recreate the actual conditions in a veterinarian's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Veterinarians who follow this method not only manage to assimilate concepts, but also develop their mental capacity through exercises to evaluate real situations and knowledge application
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. The feeling that the effort invested is effective becomes a very important motivation for veterinarians, which translates into a greater interest in learning and an increase in the time dedicated to working on the course.

Relearning Methodology

At TECH we enhance the case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

Veterinarians will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology more than 65,000 veterinarians have been trained with unprecedented success in all clinical specialties, regardless of the surgical load. Our teaching method is developed in a highly demanding environment, where the students have a high socio-economic profile and an average age of 43.5 years.

*Relearning will allow you to learn with less effort
and better performance, involving you more
in your training, developing a critical mindset,
defending arguments, and contrasting opinions: a
direct equation for success.*

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Latest Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current and procedures of veterinary techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

06 Certificate

The Postgraduate Certificate in Endocrine System, Mammary and Ophthalmologic Tumors guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This **Postgraduate Certificate in Endocrine System, Mammary and Ophthalmologic Tumors** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in Postgraduate Certificate, and meets the requirements commonly demanded by job markets, competitive examinations and professional career evaluation committees.
