# 01

# Introduction

This intensive training has the advantage of addressing, developing and expanding practical aspects of ultrasound already known but usually forgotten (vascular ultrasound, non-cardiac thoracic ultrasound, cervical ultrasound, etc.), and showing how to write a report using high-level technical language.

“

*The most effective resources in online teaching, in a practical, comfortable and high-impact learning”*

Nowadays, with new technologies, the possibility of attending live lectures anywhere in the world or taking online postgraduate or master's degree courses in countries other than the one where you live, is very simple. However, it is still difficult for ultrasound courses to dedicate part of the syllabus to talk about how to write a proper report and give guidelines for its preparation.

Therefore, veterinarians often find themselves in situations in which they are perfectly aware of the alterations and pathologies they are seeing on the ultrasound scanner, but do not know how to describe them in high-level technical language or do not know how to express them in a report.

In this Postgraduate Certificate we will provide specialized knowledge for the elaboration of a professional, complete, concise and, above all, practical ultrasound report. It is as important to know the theoretical and practical basis of ultrasound as it is to know how to write a report. At the end of the day, it is the summary of your work on a sheet of paper that should be useful, legible and understandable to a colleague or client.

As it is an online Postgraduate Certificate course, students are not restricted by set timetables, nor do they need to physically move to another location. All of the content can be accessed at any time of the day, so you can balance your working or personal life with your academic life.

*This specialization offers the bases and tools for you to become an expert in Preparing an Ultrasound Report taught with the help of renowned professionals with extensive experience in the field"*

This **Postgraduate Certificate in Preparing an Ultrasound Report for Small Animals** offers you the advantages of a high-level scientific, teaching, and technological course.

These are some of its most notable features:

- ◆ The latest technology in online teaching software.
- ◆ Highly visual teaching system, supported by graphic and schematic contents that are easy to assimilate and understand.
- ◆ Practical cases presented by practising experts.
- ◆ State-of-the-art interactive video systems.
- ◆ Teaching supported by telepractice.
- ◆ Continuous updating and recycling systems.
- ◆ Autonomous learning: full compatibility with other occupations
- ◆ Practical exercises for self-evaluation and learning verification.
- ◆ Support groups and educational synergies: questions to the expert, debate and knowledge.
- ◆ Communication with the teacher and individual reflection work.
- ◆ Content that is accessible from any fixed or portable device with an Internet connection
- ◆ Supplementary documentation databases are permanently available, even after the course

“

*You will have the experience of expert professionals who will contribute their experience in this area to the program, making this training a unique opportunity for professional growth”*

Our teaching staff is made up of professionals from different fields related to this specialty. In this way, we ensure that we provide you with the training update we are aiming for. A multidisciplinary team of professionals trained and experienced in different environments, who will cover the theoretical knowledge in an efficient way, but, above all, will put the practical knowledge derived from their own experience into the course: one of the differential qualities of this course.

This mastery of the subject is complemented by the effectiveness of the methodological design of this Postgraduate Certificate in Preparing an Ultrasound Report for Small Animals. Developed by a multidisciplinary team of e-learning experts, it integrates the latest advances in educational technology. In this way, you will be able to study with a range of easy-to-use and versatile multimedia tools that will give you the necessary skills you need for your specialization.

The design of this program is based on Problem-Based Learning: an approach that conceives learning as a highly practical process. To achieve this remotely, we will use telepractice: with the help of an innovative interactive video system, and learning from an expert, you will be able to acquire the knowledge as if you were actually dealing with the scenario you are learning about. A concept that will allow you to integrate and fix learning in a more realistic and permanent way.

*Immerse yourself in this training of the highest educational quality, which will allow you to face future challenges that may arise during daily practice in abdominal ultrasound*

*As the course is online, you will be able to train wherever and whenever you want, balancing your personal and professional life*

# 02 Objectives

Our objective is to train highly qualified professionals for the working A goal that you will reach in just a few months and that will allow you to achieve professional excellence.

“

*This specialization course will provide you with the necessary personal and professional skills to use ultrasound scanners correctly in feline patients”*

## General Objectives

---

- Improve reporting capabilities
- Increase your knowledge of the jargon used in ultrasonography
- Record and save studies and images in the most appropriate manner
- Increase skills for describing organs and lesions using technical terms

“

*If your objective is to broaden your skill set to include new paths of success and development, this is your Professional Master's Degree: a specialization that aspires to excellence"*

## Specific Objectives

---

- ◆ Correctly handle abdominal, cardiac, ophthalmic or other organ or system ultrasound reports
- ◆ Standardize the way in which reports are carried out
- ◆ Work on and interpret the most commonly used physiological and pathological measurements in ultrasound
- ◆ Train students to elaborate differential diagnoses and to issue a definitive diagnosis
- ◆ Know how to advise a clinician based on study results

03

# Course Management

We provide you with an elite teaching team made up of professionals with extensive experience in the sector. Professionals from different areas and fields of expertise that make up a complete, multidisciplinary team. A unique opportunity to learn from the best.

“

*We have a team of highly qualified teachers so that you can specialize with the best"*

## Management

### Dr. Conde Torrente, María Isabel

- ♦ Head of the Diagnostic Imaging and Cardiology Service at Hospital Veterinario Alcor. Currently
- ♦ Degree in Veterinary Medicine from the University of Santiago de Compostela in 2012 with a certified European degree
- ♦ Advanced Postgraduate Course in Diagnostic Imaging (Computerized Axial Tomography). General Practitioner Advanced Certificate TCESMD. 2019
- ♦ Postgraduate General Practitioner Certificate in Diagnostic Imaging (GPCert- DI) 2016
- ♦ Professor in Veterinary Practical Training in 2015 as a teacher for the official qualification of veterinary technical assistant
- ♦ Gives training courses on clinical and laboratory analysis for veterinarians at Hospital Veterinario Alberto Alcocer
- ♦ Medical Director and head of the Advanced Diagnostic Imaging Service at Grupo Peñagrande. Exclusive handling of TC General Electrics TriAc Revolution 16 cuts. (2017-2019)
- ♦ Head of the Diagnostic Imaging Service at Centro Veterinario Mejorada. (2016-2017)
- ♦ Responsible for diagnostic services at Hospital Veterinario Alberto Alcocer. (2013-2016)
- ♦ University of Santiago de Compostela. Department of Animal Pathology. Collaboration with the research group on heavy metal accumulation in bovine meat in collaboration with Cornell University, New York; published in the Journal of Animal Science.

## Professors

### Dr. Martí Navarro, María Teresa

- ◆ Clinical Veterinarian in several centers in Zaragoza and Valencia
- ◆ Associate Professor of the Department of Diagnostic Imaging at the CEU Cardenal Herrera University, Valencia
- ◆ Collaboration with the Cardiology Unit at Hospital la Fe, Valencia
- ◆ Degree in Biology from the University of Navarra
- ◆ Degree in Veterinary Medicine from the Faculty of Veterinary Medicine, Zaragoza.
- ◆ Improve Postgraduate Course in Cardiology
- ◆ Member of the AVEPA Diagnostic Imaging and Cardiology Group

“

*With this high level program, you will train with the best. A unique opportunity to achieve professional excellence”*

# 04

# Structure and Content

The contents of this course have been developed by the different experts on this course, with a clear purpose: to ensure that our students acquire each and every one of the necessary skills to become true experts in this field.

A complete and well-structured program that will take you to the highest standards of quality and success.

“

*An excellently complemented program that will allow you to specialize in a short time”*

## Module 1. Preparing an Ultrasound Report

- 1.1. Ultrasound Jargon I
  - 1.1.1. Nomenclature, Description and the Diagnostic Uses of Different Artifacts
  - 1.1.2. Relative Echogenicity
  - 1.1.3. Comparative Echogenicity
- 1.2. Ultrasound Jargon II
  - 1.2.1. Structural Description of Selected Organs
  - 1.2.2. Using the Movement of Structures and Organs for Assessing the Latter
  - 1.2.3. Location of Each Organ in Space and Its Relation to Anatomical Landmarks
- 1.3. Registering a Study
  - 1.3.1. How Should an Image Study be Recorded and Stored
  - 1.3.2. Study Validity Period
  - 1.3.3. Which Images and How Should I Attach Them to the Report?
- 1.4. Report Templates
  - 1.4.1. What is the Purpose of an Ultrasound Report
  - 1.4.2. Basic Outline of a Professional Ultrasound Report
  - 1.4.3. Specific Outline of Selected Ultrasound Reports
- 1.5. Indices
  - 1.5.1. Distances
  - 1.5.2. Volumes
  - 1.5.3. Ratios or Indices
  - 1.5.4. Speeds
- 1.6. Description of Lesions Observed
  - 1.6.1. Mnemonic Rule FOR TA CON E ES U V
  - 1.6.2. Subjective Assessments
  - 1.6.3. Objective Assessments
- 1.7. Diagnoses
  - 1.7.1. Differential Diagnoses
  - 1.7.2. Presumptive Diagnosis
  - 1.7.3. Firm Diagnosis

- 1.8. Final Recommendations
  - 1.8.1. Limitations of Ultrasound Studies (Operator-Dependent Technique)
  - 1.8.2. Diagnostic Recommendations
  - 1.8.3. Therapeutic Guidelines
- 1.9. Echocardiographic Report
  - 1.9.1. Function
  - 1.9.2. Structure of the Echocardiographic Report
  - 1.9.3. Differences Between Abdominal Ultrasound Reports of Other Organs and Cardiac Ultrasound Reports
- 1.10. Using Templates
  - 1.10.1. Using Templates vs. Self-reporting
  - 1.10.2. Ultrasound Report Templates
  - 1.10.3. How Can I Stand Out From the Rest by Creating My Own Templates?

“

*This Postgraduate Certificate in Preparing an Ultrasound Report for Small Animals will take you through different teaching approaches which will allow you to learn in a dynamic and efficient way”*

05

# Methodology

This training provides you with a different way of learning. Our methodology uses a cyclical learning approach: ***Re-learning***.

This teaching system is used in the most prestigious medical schools in the world, and major publications such as the ***New England Journal of Medicine*** have considered it to be one of the most effective.

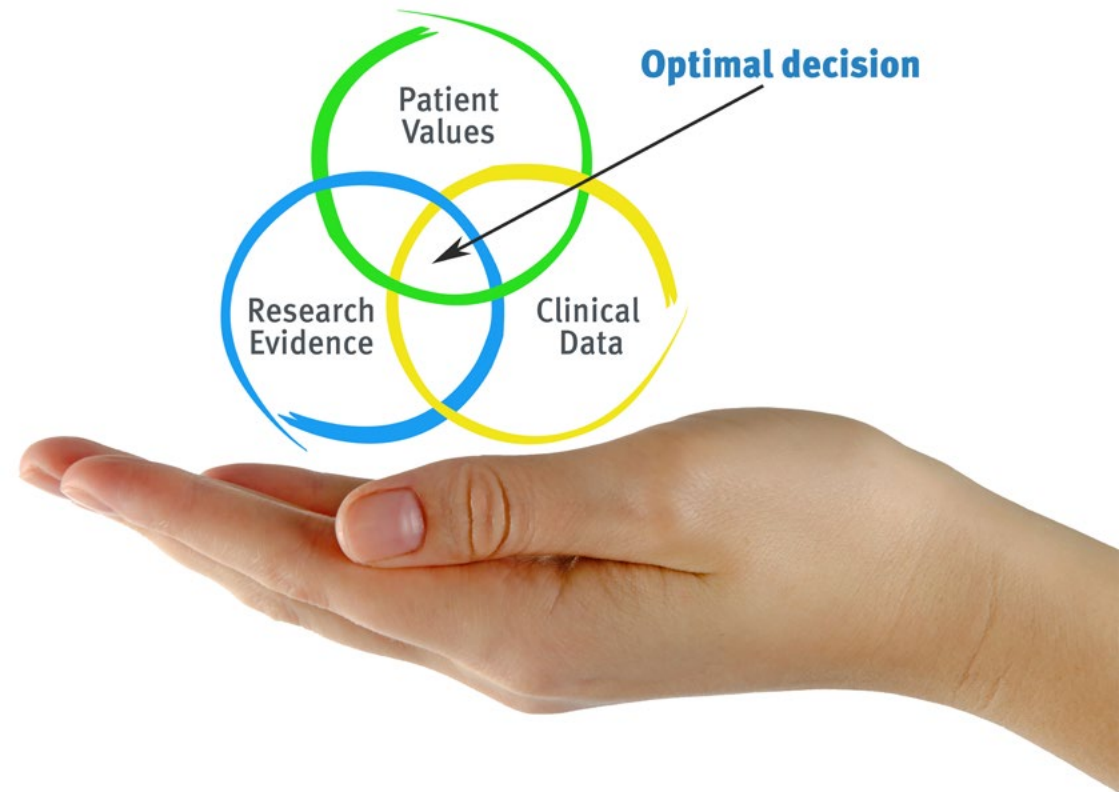

“

*Discover Re-learning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## At TECH we use the Case Method

In a given clinical situation, what would you do? Throughout the program you will be presented with multiple simulated clinical cases based on real patients, where you will have to investigate, establish hypotheses and, finally, resolve the situation. There is abundant scientific evidence on the effectiveness of this method. Specialists learn better, faster, and more sustainably over time.

*With TECH you can experience a way of learning that is shaking the foundations of traditional universities around the world*

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching potential or because of its uniqueness or rarity. It is essential that the case is based on current professional life, trying to recreate the real conditions of professional veterinary practice.

“

*Did you know that this method was developed in 1912 at Harvard for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”*

The effectiveness of the method is justified by four fundamental achievements:

1. Veterinarians who follow this method not only achieve the assimilation of concepts, but also a development of their mental capacity through exercises to evaluate real situations and the application of knowledge.
2. The learning process has a clear focus on practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. The feeling that the effort invested is effective becomes a very important motivation for veterinarians, which translates into a greater interest in learning and an increase in the time dedicated to working on the course.

## Re-learning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Re-learning.

Our University is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, which represent a real revolution with respect to simply studying and analyzing cases.

*Veterinarians will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning*

At the forefront of world teaching, the Re-learning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best Spanish-speaking online university (Columbia University).

With this methodology we have trained more than 65,000 veterinarians with unprecedented success, in all clinical specialties regardless of the surgical load. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

*Re-learning will allow you to learn with less effort and better performance, involving you more in your specialization, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation to success*

In our program, learning is not a linear process, but rather a spiral (we learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by our learning system is 8.01, according to the highest international standards.

In this program you will have access to the best educational material, prepared with you in mind:

### Study Material

All the teaching materials are specifically created for the course, by specialists who teach on the course, so that the teaching content is highly specific and precise.

This content is then adapted in an audiovisual format that will create our way of working online, with the latest techniques that allow us to offer you high quality in all of the material that we provide you with.

### Latest Techniques and Procedures on Video

We bring you closer to the latest Techniques, to the latest Educational Advances, to the forefront of current Veterinary Techniques and Procedures. All this, in first person, with the maximum rigor, explained and detailed for your assimilation and understanding. And best of all, you can watch them as many times as you want.

### Interactive Summaries

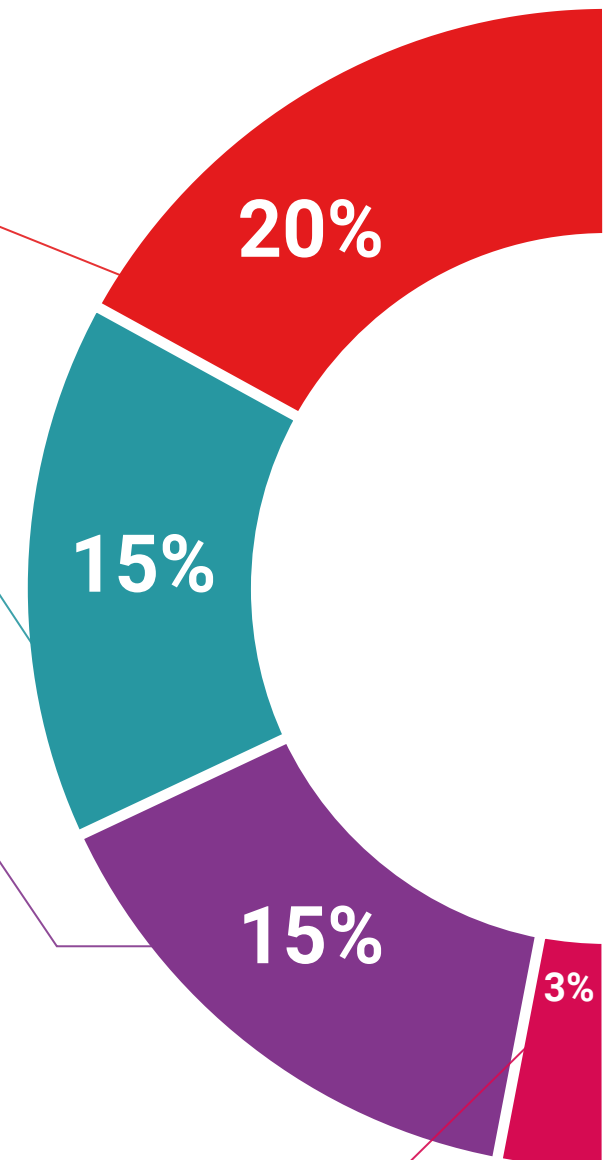

We present the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This unique multimedia content presentation training system was awarded by Microsoft as a "European Success Story".

### Additional Reading

Recent articles, consensus documents, international guides. in our virtual library you will have access to everything you need to complete your training.

#### Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, we will present you with real case developments in which the expert will guide you through focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

#### Testing & Re-Testing

We periodically evaluate and re-evaluate your knowledge throughout the program, through assessment and self-assessment activities and exercises: so that you can see how you are achieving your goals.

#### Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an expert strengthens knowledge and memory and generates confidence in our future difficult decisions.

#### Quick Action Guides

We offer you the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help you progress in your learning.

06

# Certificate

Through a different and stimulating learning experience, you will be able to acquire the necessary skills to take a big step in your training. An opportunity to progress, with the support and monitoring of a modern and specialized university, which will propel you to another professional level.

“

*Include in your training a Postgraduate Certificate in Preparing an Ultrasound Report for Small Animals: a highly qualified added value for any professional in this field"*

This **Postgraduate Certificate in Preparing an Ultrasound Report for Small Animals** contains the most complete and up-to-date scientific program on the market.

After the student has passed the evaluations, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery\*.

The certificate issued by **TECH Technological University** will specify the qualification obtained through the **Postgraduate Certificate**, and meets the requirements commonly demanded by labor exchanges, competitive examinations, and professional career evaluation committees.

Title: **Postgraduate Certificate in Preparing an Ultrasound Report for Small Animals**

ECTS: **6**

Official Number of Hours: **150**

\*Apostille Convention. In the event that the student wishes to have their paper diploma stamped with a Hague Apostille, TECH EDUCATION will make the necessary arrangements at an additional cost.
